Fiscal situation

1

Overview 2023/24

Let's begin by summarizing our review of the catastrophic failure of cooperatives. This incident marks the first large-scale collapse of non-regulated financial cooperatives since the promulgation of the Federal Nepal constitution, highlighting a dire need for a thorough and uncompromising examination of the underlying failures.

Inexperienced and poorly trained staff within the cooperatives were directly involved in conducting business. Consequently, the cooperative's management was utterly incapable of managing risks, and its board failed miserably in overseeing management. Additionally, the review uncovered that supervisors did not identify issues swiftly enough, and when risks were finally acknowledged, their response was agonizingly slow and insufficient to effect meaningful change in management behavior.

There is an urgent need to enhance the speed, force, and agility of supervision to align with the risks, size, and complexity of cooperatives. The Government of Nepal (GoN) must focus on several critical areas: intensifying supervision at an appropriate pace, ensuring timely supervisory action and escalation, and improving the overall agility of supervision. Immediate and long-term measures must be implemented to strengthen supervision.

Supervisors do not manage cooperatives; their role is to evaluate a cooperative's significant risks in light of its operations and ensure the cooperative maintains adequate governance and controls, capital, and liquidity to function both in normal and stressful times. The GoN should concentrate on the unique risks of each cooperative while also considering the broader risk landscape across similar firms within the banking system. These two perspectives are crucial for identifying and prioritizing key risk areas and compelling management to address the most critical issues.

The goal of supervision is not to prevent all failures. In a market economy, poorly managed firms should be allowed to fail. Likewise, the aim of supervision is not to dictate a cooperative's business model viability; the market will determine that. Instead, the focus should be on helping cooperative managers and boards identify and address weaknesses in risk measurement and management practices, legal compliance, and the adequacy of capital and liquidity given the cooperative's risk profile. Proactive supervisory actions can help firms address issues before they become insurmountable, allowing for earlier intervention and providing firms with more options to rectify their problems..

2024 “Optimistic outlook while exercising prudence”

Let's start by evaluating the current situation with a more critical perspective.

Despite some proactive measures taken by the central bank to address financial stability risks, the effectiveness of these actions remains questionable. The Nepal Rastra Bank (NRB) recognizes the complex interplay between monetary policy and financial stability, but whether their strategies will prevent undue strain on the financial system is uncertain. This situation reveals the NRB's ongoing struggle to maintain a stable and secure financial environment.

Recent economic indicators for April 2024 show only a slight improvement in consumer spending compared to previous quarters. The rebound in retail sales, particularly in interest rate-sensitive sectors like motor vehicles, may be a temporary response to the NRB's accommodating monetary policy rather than a sign of sustained economic health.

The recent arrest of businessmen and bureaucrats has understandably caused significant concern within the business community. The lack of transparent communication regarding the rationale behind these actions has only heightened uncertainties. While upholding the rule of law is crucial, the presumption of innocence until proven guilty must be maintained to avoid undermining confidence in the legal system.

Promoting transparency and accountability is essential to restore trust in the stability and fairness of the legal system within the business community. However, the potential negative impacts on economic activity cannot be overlooked. The business community's confidence in the economy's resilience to navigate through these challenges remains fragile. Although there are some positive signs in both manufacturing and non-manufacturing activities, these improvements are modest at best. The expectation that moderate long-term interest rates will support household and business expenditures is overly optimistic, given the persistent uncertainties.

While these trends offer a glimmer of hope, caution is necessary, especially considering past fluctuations in inflation and economic activity. The recent easing of financial conditions serves as a stark reminder of the multitude of factors that can influence economic trends, highlighting the critical need for prudent policymaking. Overall, while there is some momentum heading into 2024, a more cautious and realistic outlook is warranted. Instead of an overly optimistic view, it is imperative to remain vigilant and prudent in managing the economic challenges ahead.

2024 "Persistent Stagnation in Bank Credit Growth Despite Lower Lending Rates"

Economic activity within Nepal has been sluggish, although there are some positive developments, primarily attributed to increased remittances. However, the manufacturing sector, which plays a pivotal role in industrial activity, has not experienced notable advancements on the supply side.

Migration and urbanization have triggered a downturn in rural demand, expected to persist at lower levels compared to the previous fiscal year of 2023/24. Throughout the ongoing fiscal year, there has been a 1.52% decrease in the weighted average lending rates. Consequently, there has been a slight rise in urban demand for domestic capital goods, as evidenced by various economic indicators.

Despite the low lending rates, credit demand has remained subdued, with bank credit growth remaining stagnant. This is attributed to the elevated concentration of government securities and excess liquidity held by financial institutions. As a result, banks have persisted in adjusting their lending and deposit rates downwards to accommodate the lack of significant demand for credit. This ongoing trend has resulted in notable decreases in the weighted average lending and deposit rates.

Consumer confidence for this year has reached a record low, and construction activity has also been lackluster. Investment outlook remains bleak due to various factors, including subdued demand for credit from corporate, especially those in manufacturing; sustained low government capital expenditure; weakened balance sheets of both banks and corporates; diminished capacity utilization; and declining business sentiment.

Analyzing various economic indicators, it appears contradictory to conclude whether the Nepalese economy is shrinking!

<p><i>Despite the perception of reduced imports, the average import trend shows an increase.</i></p>	<p><i>Similarly, while there's a belief remittance inflow may fall, the average remittance trend indicates growth.</i></p>	<p><i>Contrary to the notion of decreased in government revenue, the average revenue trend shows an increase.</i></p>	<p><i>Moreover, despite assumptions of reduced government spending, the average spending trend suggests otherwise.</i></p>	<p><i>Although the interest rate is perceived to be at its peak, the average interest rate trend is actually decreasing.</i></p>	<p><i>Additionally, although there's a perception of reduced forex reserves, the average reserve trend indicates growth.</i></p>	<p><i>It is said that NPA level of BFIs are increasing if you look from NRB prospective BFIs are more prudent and are becoming more transparent.</i></p>	<p><i>It is said industrial capacity utilization is low, however it is argued that industries are over capitalise.</i></p>	<p><i>It said that loan growth is slow indicating low confidence, however it is observed that borrowers are over leverage.</i></p>
--	--	---	--	--	--	--	--	--

Considering these conflicting observations, it is challenging to determine whether the Nepalese economy is experiencing growth or contraction.

Strategic Measures for Economic Recovery and Stimulus Initiatives in Nepal

Strategic Path for Economic Recovery

The Government of Nepal is urged to articulate a comprehensive strategy for economic recovery, incorporating the following measures:

3. Embrace the "New Economy"
Identify and capitalize on opportunities within the "new economy," focusing on financial services, digital technology, telecommunications, and other sectors less reliant on physical presence.

4. Enhance Competitiveness
Evaluate the ease of doing business, aligning with international standards to enhance competitiveness.

1. Foundational Concepts for Inclusive Revival

Develop and prioritize foundational concepts to ensure an inclusive economic revival.

2. Sectoral Adaptation and Support

Anticipate and address challenges in vital economic sectors through strategic support, encompassing agriculture, manufacturing, retail, hospitality, construction, and related industries.

6. Stakeholder Engagement
Promote active engagement with stakeholders, including businesses, employee representatives, and other bodies.

7. Tailored Initiatives

Create, develop, and assess actionable initiatives tailored to specific sectors (e.g., hospitality, Agri, and technology) and overarching themes (e.g., productivity).

8. Data Enhancement

Scrutinize existing data sources and explore innovative metrics to improve decision-making.

9. Performance Framework

Contemplate a new delivery and performance framework for reporting key economic achievements.

Stimulus Initiatives

These recommendations are crucial for steering Nepal towards economic recovery and sustainable growth.

1

Stimulating Business Activity

- Support private sector growth and encourage investment promotion.

2

Agro-Industrialization

- Promote agro-industrialization to address challenges in agriculture, including low production, inadequate post-harvest handling, limited value addition, and insufficient market access.

3

Infrastructure Development

- Invest in essential infrastructure for economic growth, focusing on transportation and power infrastructure.

4

Credit Access for MSMEs

- Implement a scheme to reduce lending risk for micro, small, and medium enterprises (MSMEs), making it more appealing for financial institutions to lend to this subsector.

5

Tax Reform

- Harmonize, abolish, and reduce tax rates to improve the business and investment environment.
- Amend fees and levies imposed by regulatory authorities and departments.
- Strengthen tax law enforcement to address evasion challenges and minimize revenue leakages.

6

Effective Public Expenditure

- Maintain fiscal discipline and increase the efficiency of public funds.
- Allocate funds to priority areas stimulating economic growth.
- Prioritize ongoing projects over committing to new ones.

Charting a New Course for Reform

Financial Sector Reform Objectives:

The primary goals of financial sector reform should encompass averting credit crunches and banking crises while emphasizing effective management should such crises occur. Additionally, these reforms must prioritize support for low-income earners. Prudential regulation and supervision should address not only microeconomic but also macroeconomic risks associated with boom-bust cycles.

Asset Management Company (AMC):

Given the escalating levels of non-performing assets (NPAs) and the potential for corporate defaults to trigger economic downturns and unemployment, the opportune moment has arrived to initiate the establishment of an Asset Management Company (AMC). Establishing an AMC to handle the bad loans of Banking and Financial Institutions (BFIs) can strategically address NPAs and enhance the financial health of the banking sector. The creation of an NPA management AMC is a pivotal step in addressing challenges posed by bad loans, benefiting BFIs by improving financial health and contributing to overall economic stability and growth. I wholeheartedly endorse the establishment of such an institution and believe it can be a game-changer in addressing NPA-related issues in the financial industry.

Amendment to the NRB Act:

Amending the NRB Act should heavily emphasize a comprehensive evaluation of the NRB Board's composition. The current composition, predominantly comprising retired NRB employees, should undergo restructuring to include experts from diverse economic and professional backgrounds. However, careful consideration of specific qualifications and selection criteria for these external experts is crucial to ensure they possess the necessary skills and knowledge to contribute effectively to the central bank's functions. Additionally, the governance structure should strike a balance between external expertise and the central bank's internal knowledge and experience.

Establishment of a Monetary Policy Committee:

Establishing a Monetary Policy Committee is crucial for ensuring both independence and accountability in the policymaking process. While delineating the roles of monetary policy and credit policy can yield benefits, emphasizing coordination and communication among responsible authorities is paramount. These factors play a pivotal role in safeguarding overall economic stability and the soundness of the financial system. **While commendable progress has been made with the formation of a Monetary Committee by the NRB, it's imperative to initiate corresponding amendments in the NRB Act to align with these provisions on monetary policy actions.**

Charting a New Course for Reform

BAFIA Amendment:	<p>The proposed amendment in the Banking and Financial Institutions Act (BAFIA) has taken strides towards segregating banking and business activities. However, it is advisable to implement this segregation in a phased manner. Categorizing larger family members as related parties might encroach upon individuals' fundamental rights. Hence, the amendment should revisit this aspect.</p> <p>Furthermore, the BAFIA requires amendments to include provisions for an exit mechanism for Banking and Financial Institutions (BFIs) promoters. Encouraging a substantial public holding will enhance governance standards within these institutions. Additionally, it is advisable to reassess the composition of the Board, introducing a balanced mix of executive and non-executive directors to bolster governance. Smooth Implementation: <i>Potential Government Strategies for Effective Implementation</i></p> <ol style="list-style-type: none">1. <i>Adjusting Section 52: Substituting One Percent with Five Percent</i>2. <i>Emphasizing Individual Holdings: A Shift in Focus from Collective Holdings</i>3. <i>Voting Rights Restriction: Limiting Borrowers' Voting Rights to 0.2% of Outstanding Bank Loans</i>4. <i>Mechanism Alignment: Utilizing Existing Mechanisms in Accordance with Legal Framework</i>
GDP Base Review:	<p>The Government of Nepal should contemplate updating the base year for GDP calculation from 2010/11 to 2020/21. This adjustment is warranted due to four significant events post the Great Gorkha Earthquake: a trade embargo, changes in government structure, and the impact of the Covid-19 pandemic. Shifting the base year to 2020/21 will provide a fresh perspective for policy formulation and response, considering the evolving economic landscape</p>
Prompt Corrective Action:	<p>In addition to the current PCA guidelines, the NRB should consider introducing supplementary provisions. If the net NPA level is below 7%, no further action is necessary. However, if it surpasses 7% but remains below 9%, falling within the first threshold, BFIs should refrain from approving new loans. Crossing the 9% threshold triggers the second tier, where BFIs must abstain from accepting new deposits. Should this metric reach 11% or higher, the bank will be categorized into the third tier, prompting PCA initiation.</p> <p>Furthermore, concerning the Income Tax Act, the permissible provisions charged to the Profit and Loss statement (P&L) should be increased from 5% to 9%. Additionally, the NRB should undertake a comprehensive review of the risk weightage assigned to various items on the balance sheet. This involves a meticulous assessment of the potential risks associated with different assets and liabilities held by BFIs. Through recalibrating the risk weightage, the NRB can ensure that the regulatory framework accurately reflects the inherent risks in banking activities, thereby fostering prudence and stability in the financial sector.</p>

Decriminalization of Corporate Laws: Paving the Way for Business Innovation

In today's rapidly evolving business environment, decriminalization is crucial for fostering growth and innovation. But what does decriminalization mean, and why is it important?

Understanding Decriminalization:

Decriminalization involves removing criminal penalties for certain corporate actions or omissions. Instead of criminal prosecution, non-compliance may lead to civil fines. This shift from punitive measures to a more pragmatic approach helps protect business reputations and build trust and confidence among stakeholders.

Reasons for Decriminalizing Business Laws:

- **Protection of Reputation:** Criminal charges can damage a business's reputation, affecting its relationships with customers, partners, and investors, even if the charges are not substantiated.
- **Facilitating Innovation:** Simplified compliance protocols and streamlined procedures encourage creativity and investment, driving economic growth.
- **Global Trends:** Leading economies like the UK, Singapore, and the US are implementing regulatory reforms to reduce bureaucracy and enhance the business environment, setting a model for others to follow.

Tangible Benefits of Decriminalization:

- **Reduced Compliance Burden:** Businesses can focus on core operations and innovation without the fear of imprisonment for minor infractions.
- **Faster Business Setup:** Streamlined regulations speed up the registration process, attracting more entrepreneurs and investment.
- **Lower Costs:** Legal fees associated with defending against minor criminal charges are reduced, and simplified regulations lower administrative costs.
- **Improved Efficiency:** Resources are freed up, allowing courts to prioritize serious crimes. Businesses are motivated to self-regulate to avoid fines.
- **Enhanced Business Confidence:** A predictable regulatory environment fosters trust and encourages risk-taking, driving economic growth.

Real-World Examples: India's Jan Vishwas Bill and amendments to Korea's Companies Act highlight the positive impact of decriminalization on business landscapes.

Challenges: Balancing deterrence with leniency for minor infractions and ensuring effective enforcement mechanisms remain critical issues.

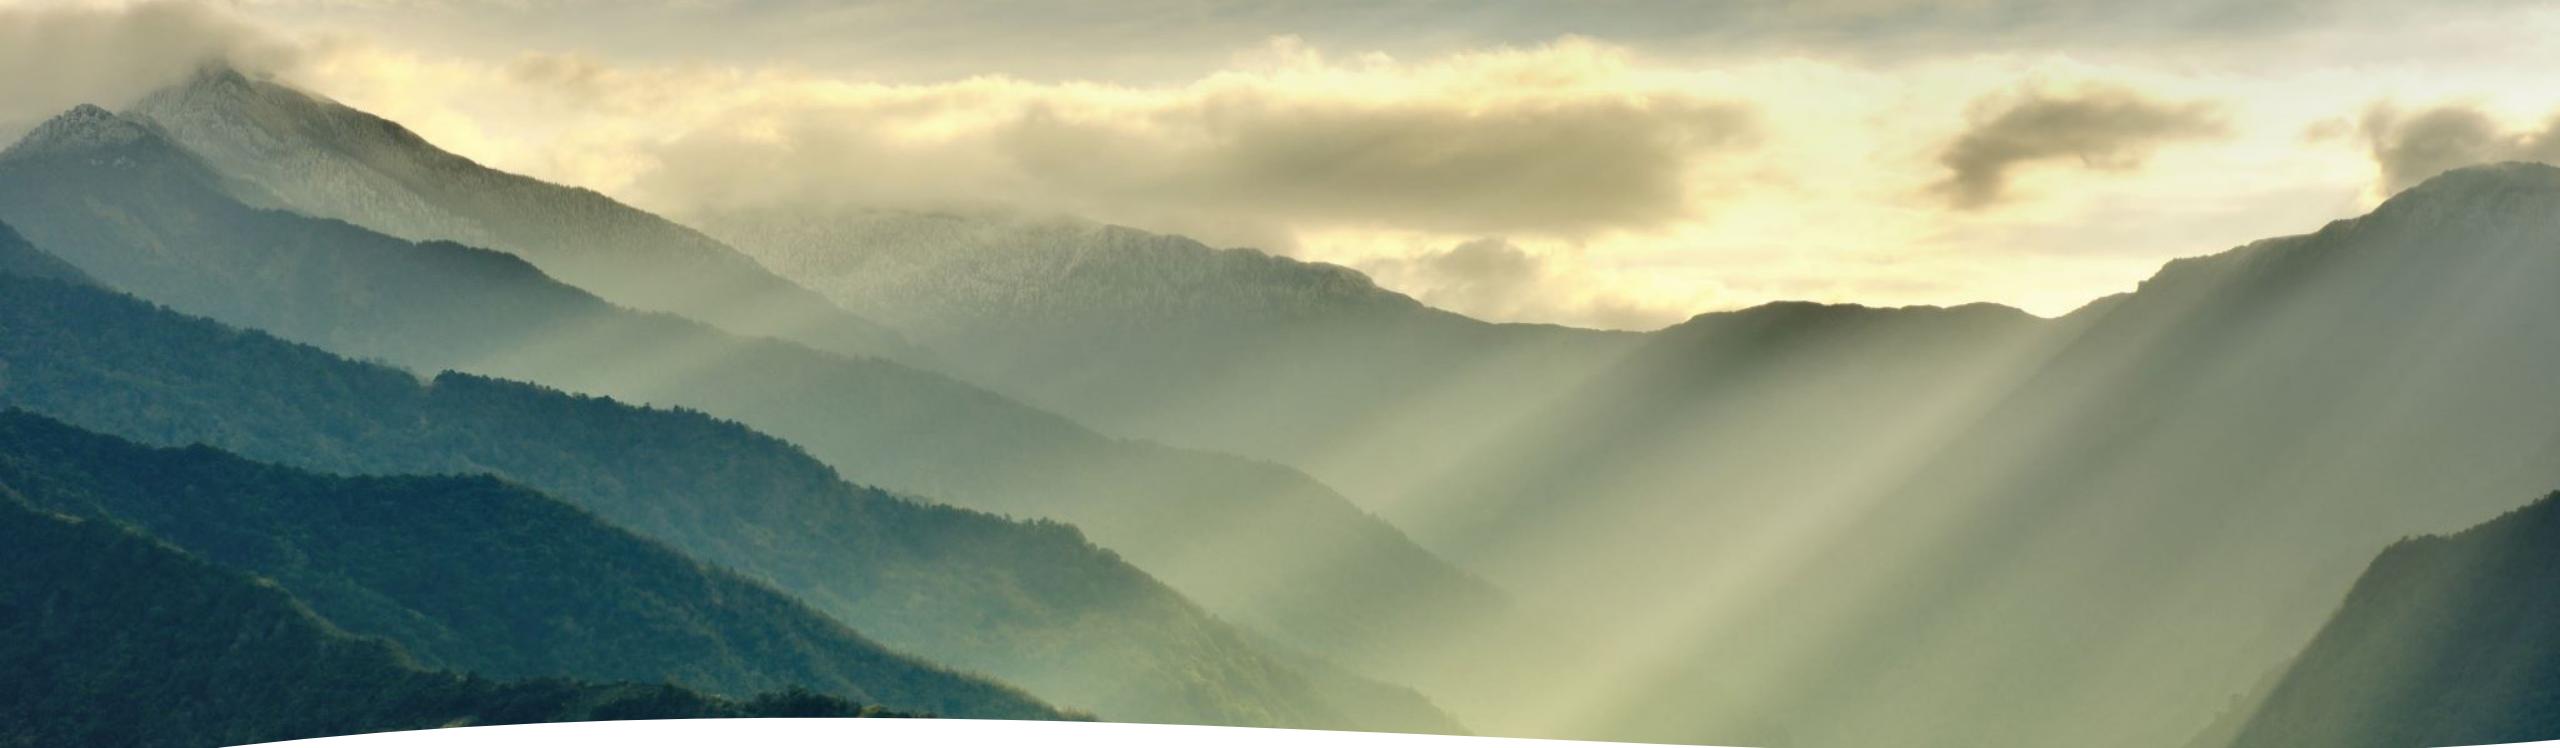

Conclusion: Decriminalization is not about avoiding consequences but creating a business-friendly environment that promotes growth and innovation. Pragmatic reforms in corporate law are essential for shaping a brighter future for businesses worldwide.

Nine Enablers of Nepalese Economy

As capital expenditure is crucial for achieving growth objectives in the Federal Structure Economy, Nepal should focus on following basic principles:-

- *Design Long-term vision and strategy for economic development and social harmony,*
- *Prepare Project Banks - investment project preparation to invite local as well as foreign investment,*
- *Reduce Budgetary processes to speed up capital expenditure,*
- *Improve Procurement Efficiency and maintain budgetary discipline,*
- *Implement Stringent Contact Management and enforcement requirements to maintain time schedule of the project.*
- *Design an Effective Monitoring system to improve the productivity of investment,*
- *Appoint Competent Project Personnel led by dynamic person,*
- *Support effective Legal Institutional Framework for PPP investment and introduce fund base investment approval process.*
- *Enabling sectoral policy Operation Framework*

The government of Nepal must plan effectively and effectively and should continuously monitor its activities to achieve sustainable goals and high growth.

Climate Change: Assessing Nepal's Role and Urgent Needs

Despite not being a major contributor to climate change, Nepal is currently grappling with its severe consequences. Even though our nation has not significantly contributed to climate-altering activities, we are acutely feeling the impact.

As we endeavor to shield our beautiful country of Nepal from the adverse effects of climate change, it becomes imperative to call on countries with substantial emissions to acknowledge their pivotal role in this global challenge. Collaborative efforts are essential to ensure that Nepal receives its fair share of assistance for implementing effective climate protection measures.

Economic Information

2

16th Five-Year Periodic Plan (2081/82-2085/86)

GOOD GOVERNANCE,

SOCIAL JUSTICE,

PROSPERITY.

The plan aims to address structural obstacles to development and implement transformational strategies to achieve its ambitious targets.

<i>Strengthen</i>	<i>Strengthen macroeconomic fundamentals and promote rapid economic growth.</i>
<i>Enhance</i>	<i>Enhance production, productivity, and competitiveness.</i>
<i>Create</i>	<i>Create decent jobs and promote productive employment.</i>
<i>Foster</i>	<i>Foster educated, skilled, and healthy human capital.</i>
<i>Develop</i>	<i>Develop quality infrastructure and integrated transport systems.</i>
<i>Promote</i>	<i>Promote modern, sustainable urbanization and settlements.</i>
<i>Empower and include</i>	<i>Empower and include marginalized communities.</i>
<i>Improve</i>	<i>Improve fiscal management and capital expenditure.</i>
<i>Promote</i>	<i>Promote good governance, LDC graduation, and sustainable development goals.</i>

Economic Projections

1. *Raise the revenue-GDP ratio to 24% (current: 17.8%).*
2. *Increase federal expenditure to 32% of GDP (current: 26.5%).*
3. *Maintain sovereign debt below 45% of GDP.*
4. *Reduce the trade deficit to 24% of GDP (current: 27%).*

Social and Infrastructure Goals:

1. *Enhance access to health facilities to 90% of families (current: 77%).*
2. *Raise literacy rates to 85% and reduce unemployment from 11.4% to 5%.*
3. *Boost hydropower production from 3,100 MW to 11,769 MW.*
4. *Ensure 90% internet access and 85% financial institution access for families.*

Economic Goals:

1. *Achieve an economic growth rate of 7.3% (current: 3.9%).*
2. *Increase per capita income to \$2,413 (current: \$1,456).*
3. *Reduce absolute poverty to 20.3% and consumer inflation to 5%.*
4. *Improve the human development index from 0.601 to 0.650.*
5. *Extend average life expectancy from 71.3 to 73 years.*

Sectoral Strategies:

A. Foreign Employment:

- Identify new high-return employment destinations.
- Sign bilateral labor agreements for safe and secure foreign employment opportunities.

B. Energy Sector:

- Export electricity worth Rs 41 billion annually by the end of the plan.
- Promote the energy sector to reduce the trade deficit.

C. Employment and Social Goals:

- Create 1.2 million jobs annually.
- Raise the minimum wage to Rs 25,000 per month.
- Increase social security beneficiaries to 2 million.

D. Governance and Competitiveness:

- Improve the rule of law index from 0.52 to 0.80.
- Increase the global competitiveness index from 52 to 65.
- Enhance the corruption reduction awareness index from 35 to 43

Implementation Strategy:

- Focus on structural transformation, adopting new technologies, and promoting research and development.
- Collaborate with private, government, and non-government sectors for national skill development.
- Prioritize marginalized community empowerment and inclusive employment

Nepal Distributive Trade Survey, 2022

The Nepal Distributive Trade Survey, 2022 conducted by the National Statistics Office aimed to estimate economic indicators of the wholesale and retail trade sector for national account purposes. This included assessing CPC-wise trade margins of goods and collecting information on income, expenditure, investment, employment, compensation of employees, and changes in stock from a sample of 18,000 trade establishments.

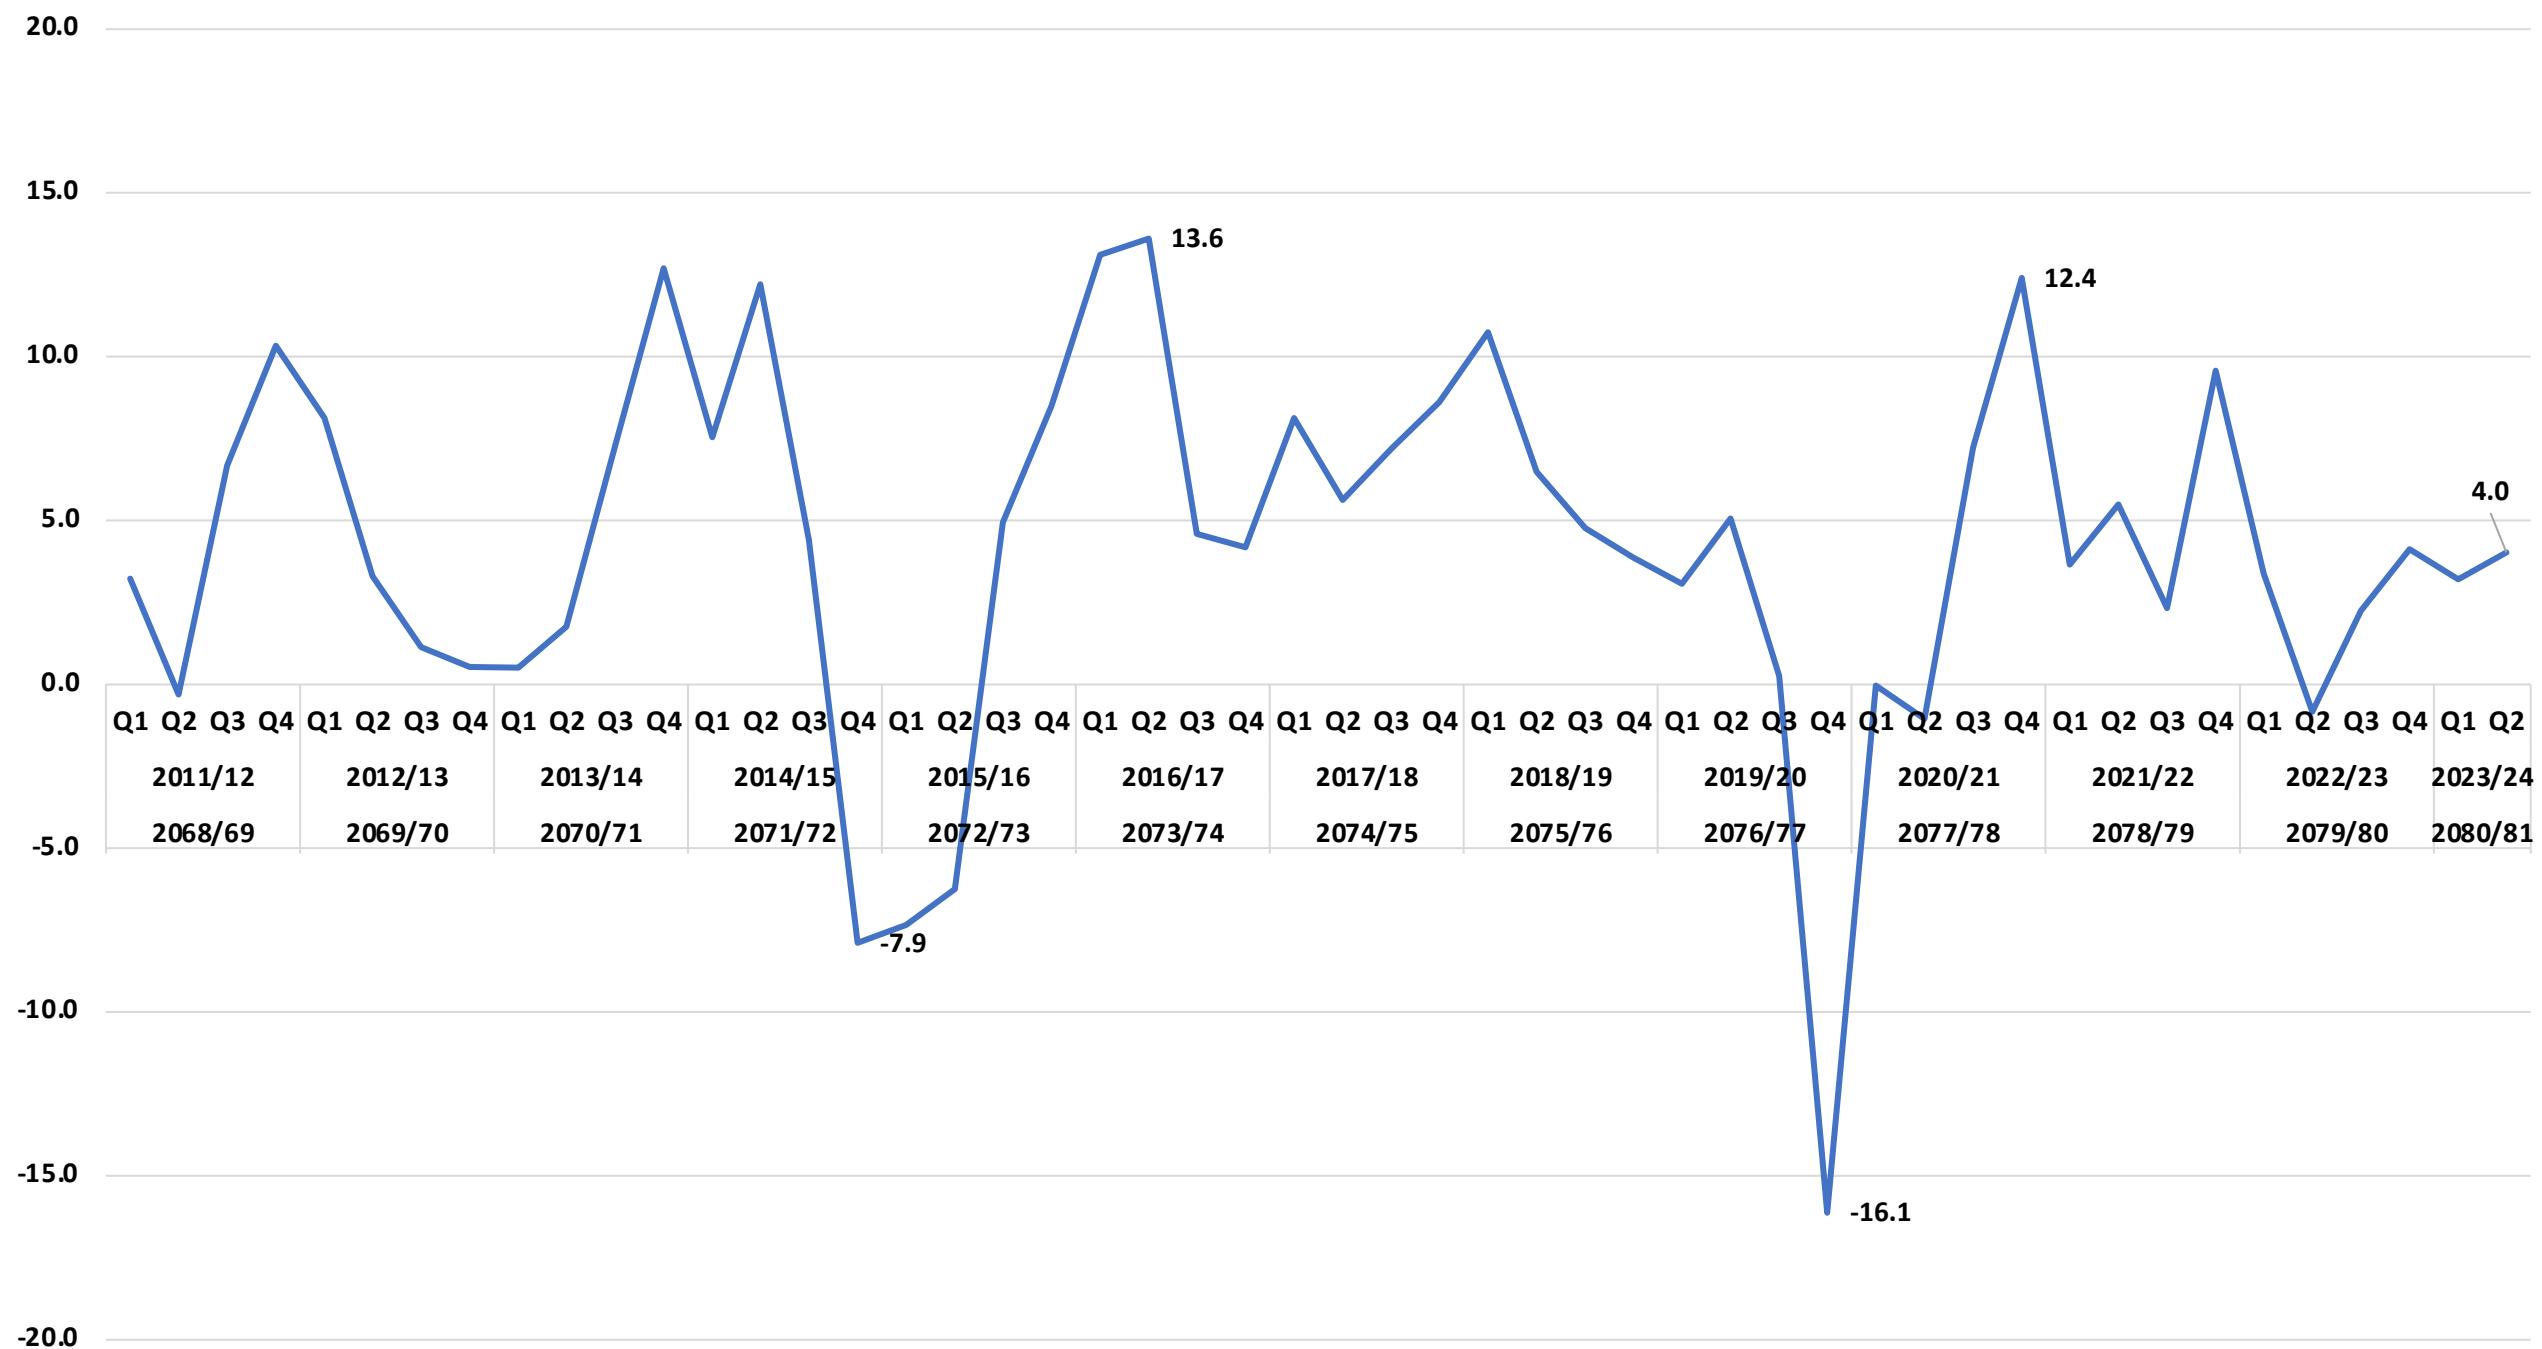

The survey revealed that 68.2% of trade establishments (comprising wholesale and retail trade and repair of motor vehicles and motorcycles) are registered with government agencies, while 31.8% remain unregistered. Concerning trade margins, wholesale and retail trade and repair of motor vehicles and motorcycles reported the highest margin at 24.02%, followed by wholesale trade at 13.01%, and retail trade margin at 18.28% among the three NSIC divisions.

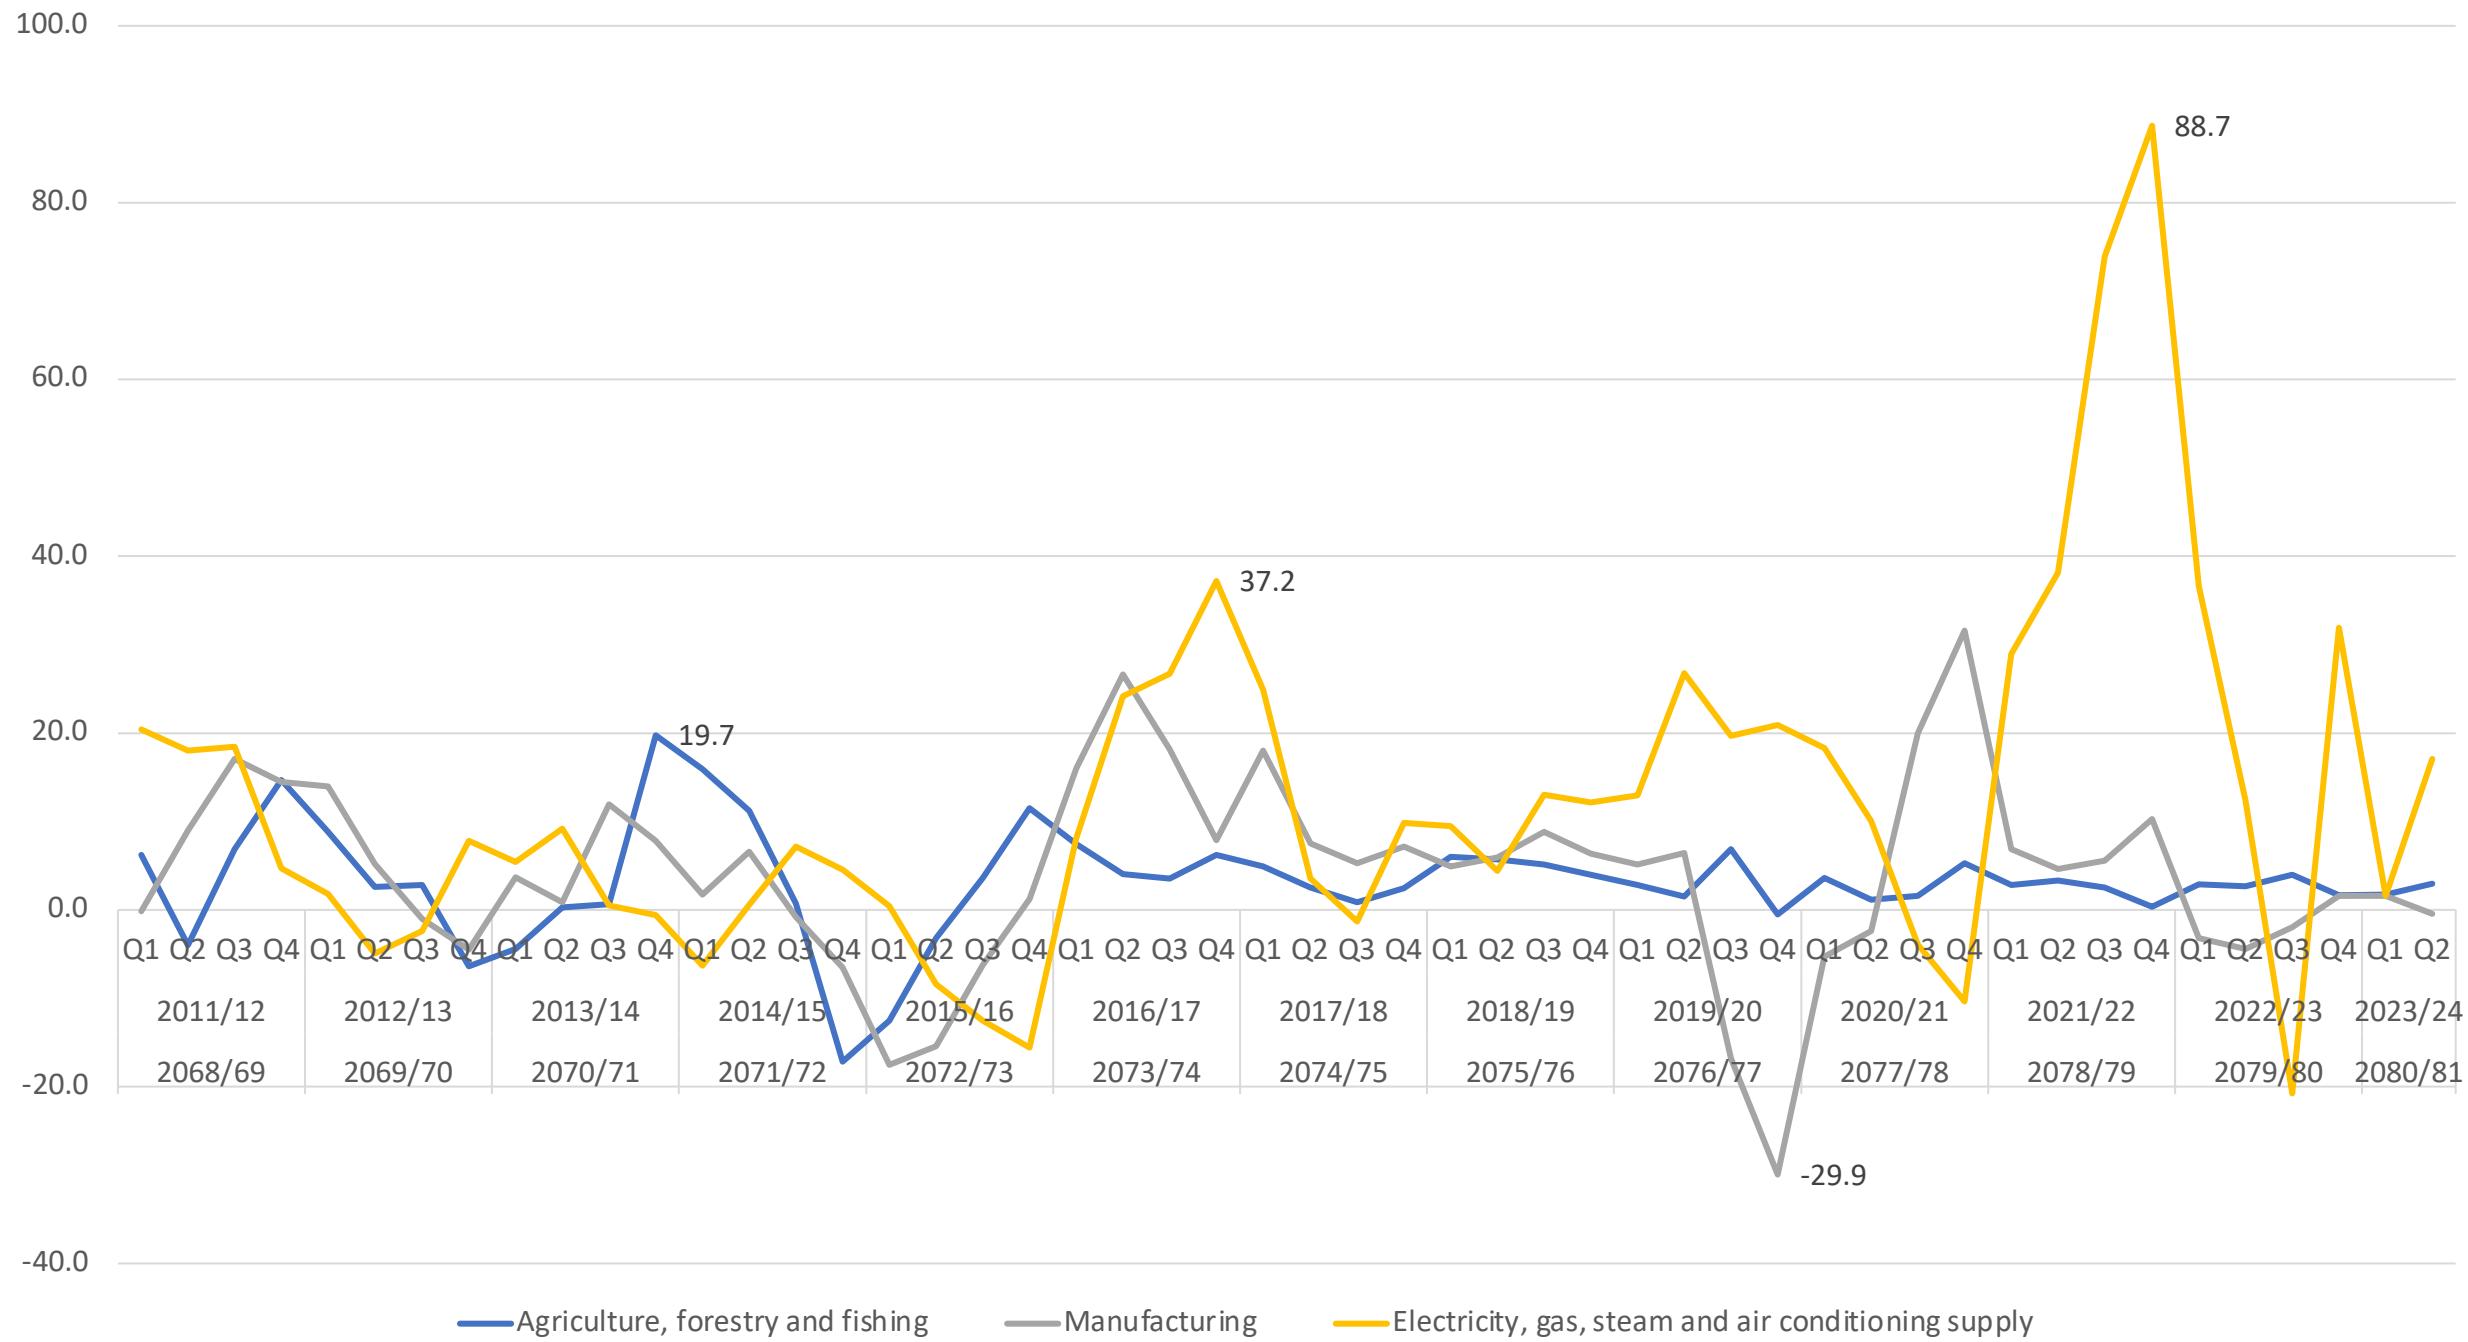

The total number of individuals engaged in the wholesale and retail trade sector is 1,130,645, with 726,681 (64%) being male and 403,964 (36%) female. On average, there are two individuals engaged in each establishment. The survey found that 88.65% of individuals are involved in retail trade, 5.8% in motor trade and repair, and 5.54% in wholesale trade establishments. Only about one-fifth of the total individuals engaged in this sector are paid. The average annual wages and salaries per paid employee amount to NPR 208,494 (NPR 17,374 per month).

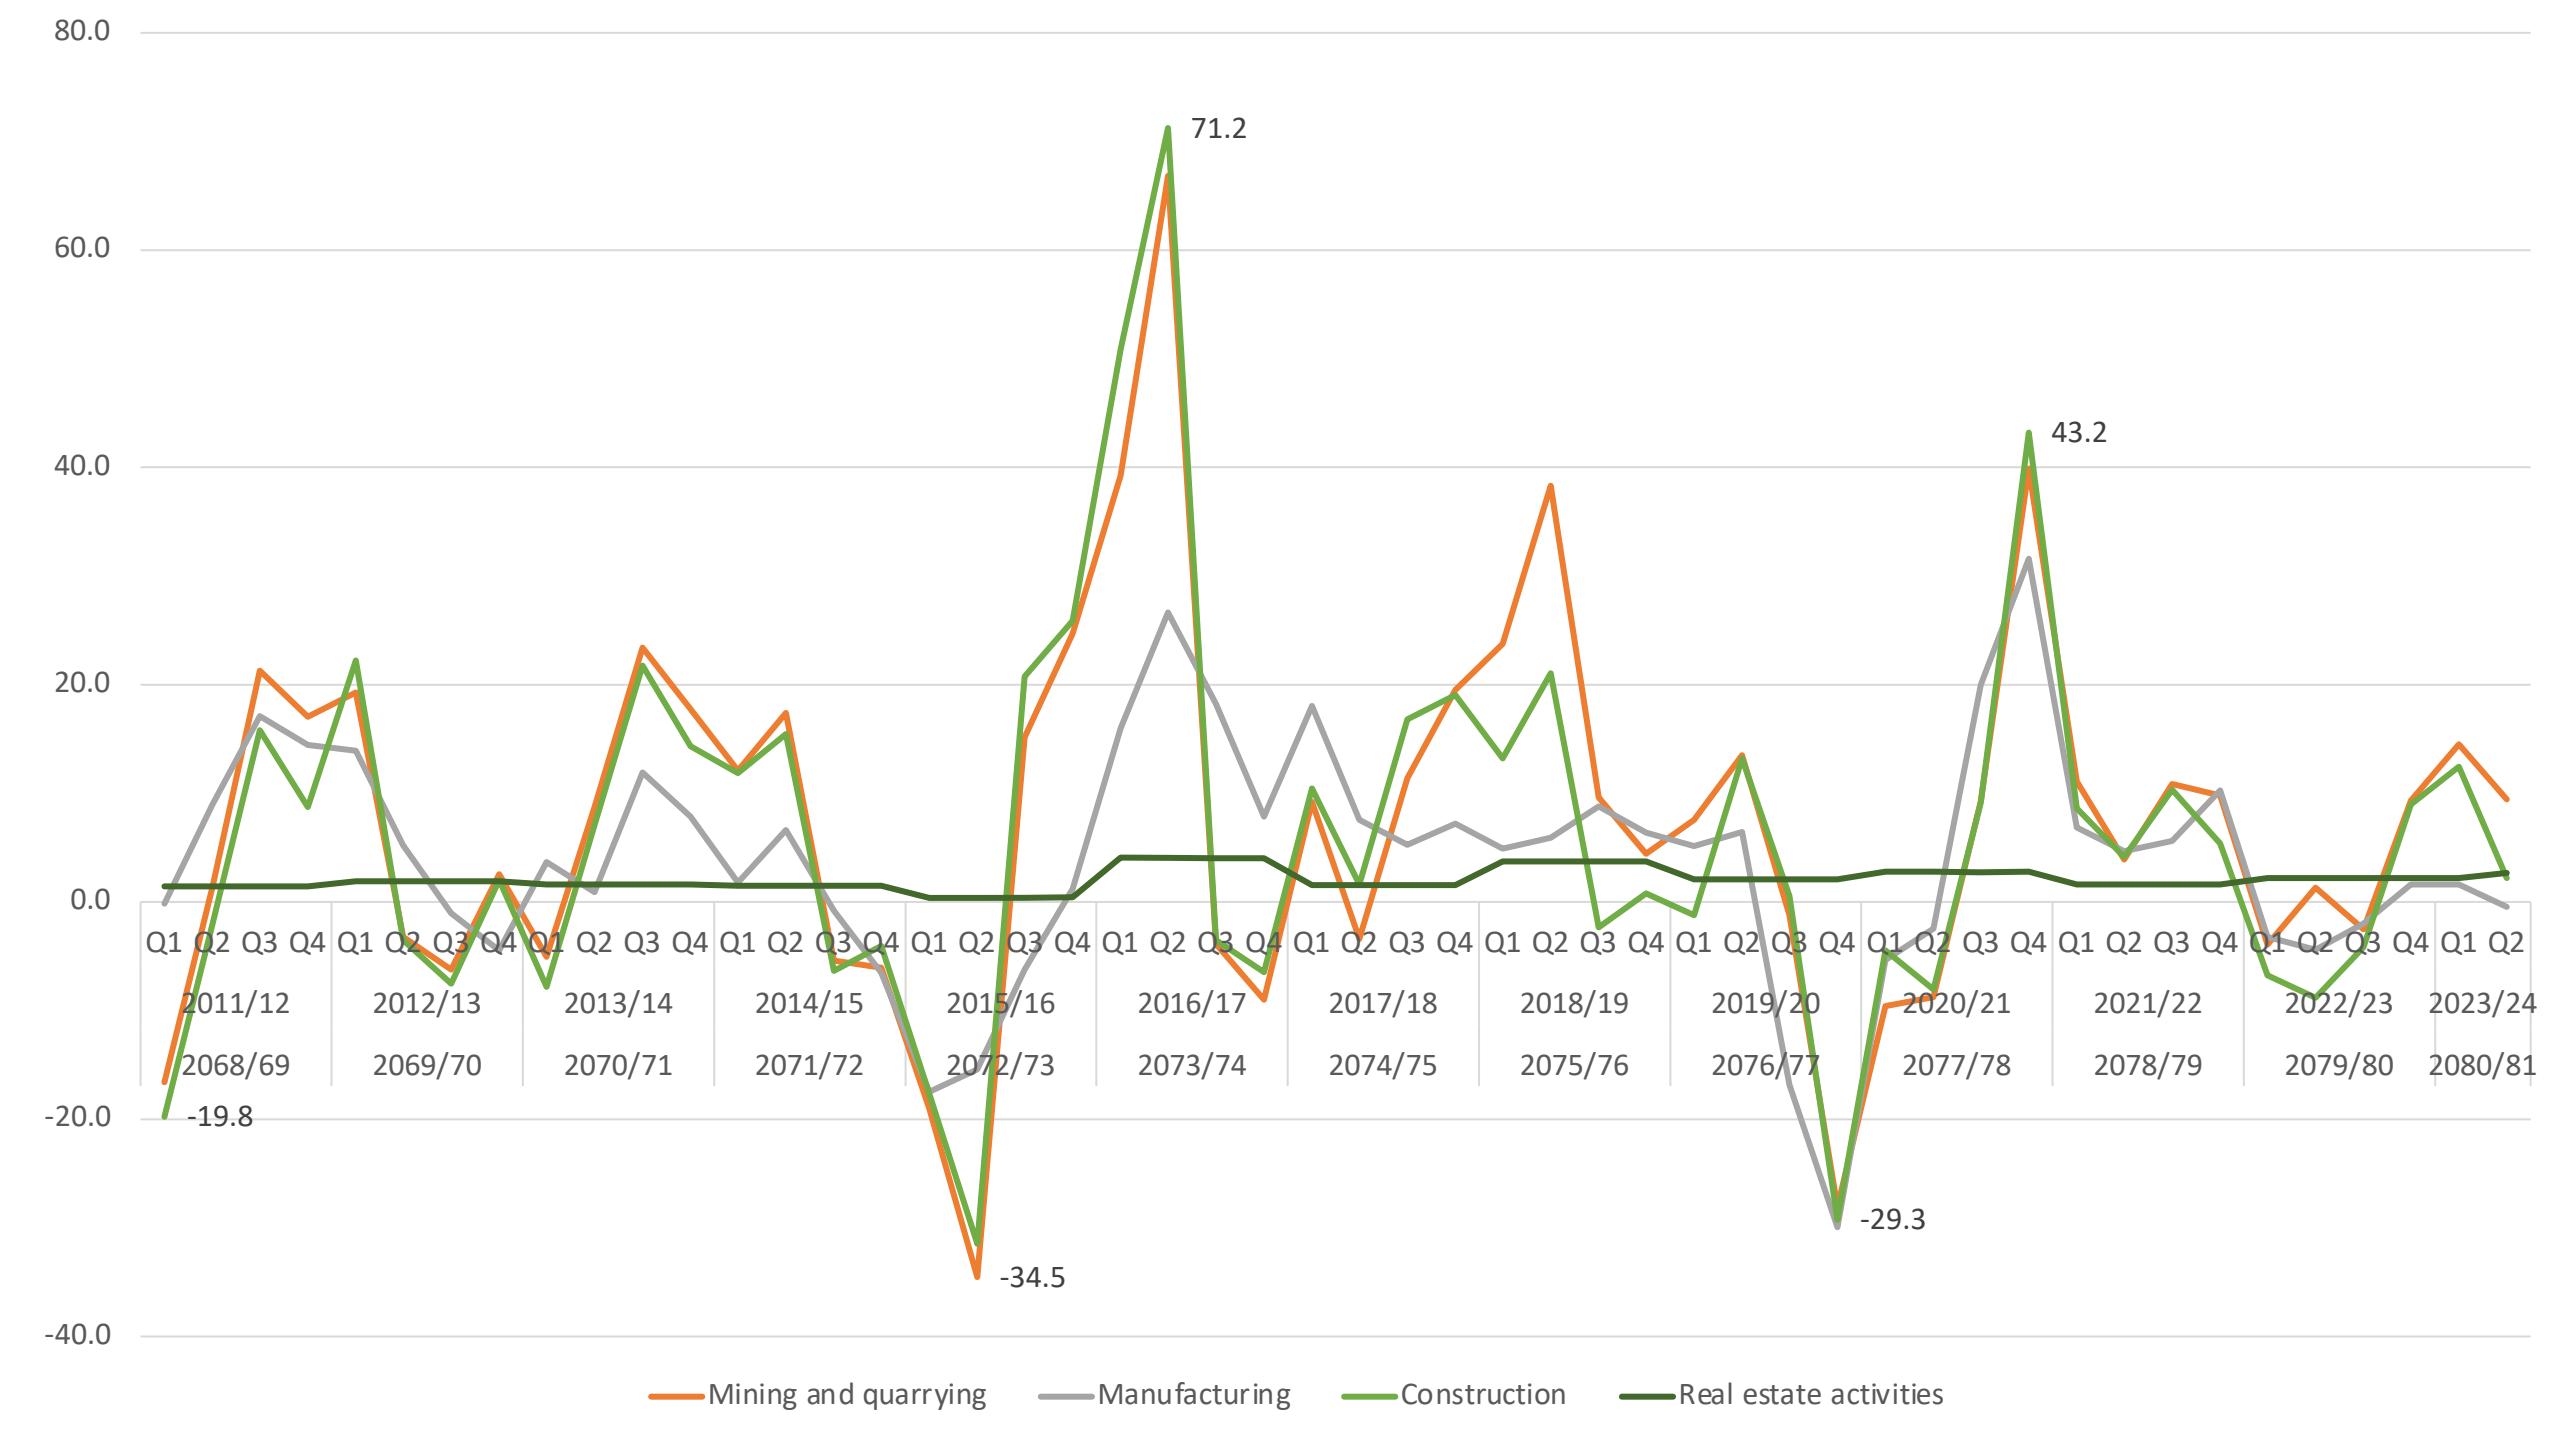

The average annual operating cost per establishment stands at NPR 264,373. Wholesale trade establishments recorded the highest operating cost per establishment at NPR 1,314,379, followed by motor trade and repair at NPR 583,393, and retail trade at NPR 219,240.

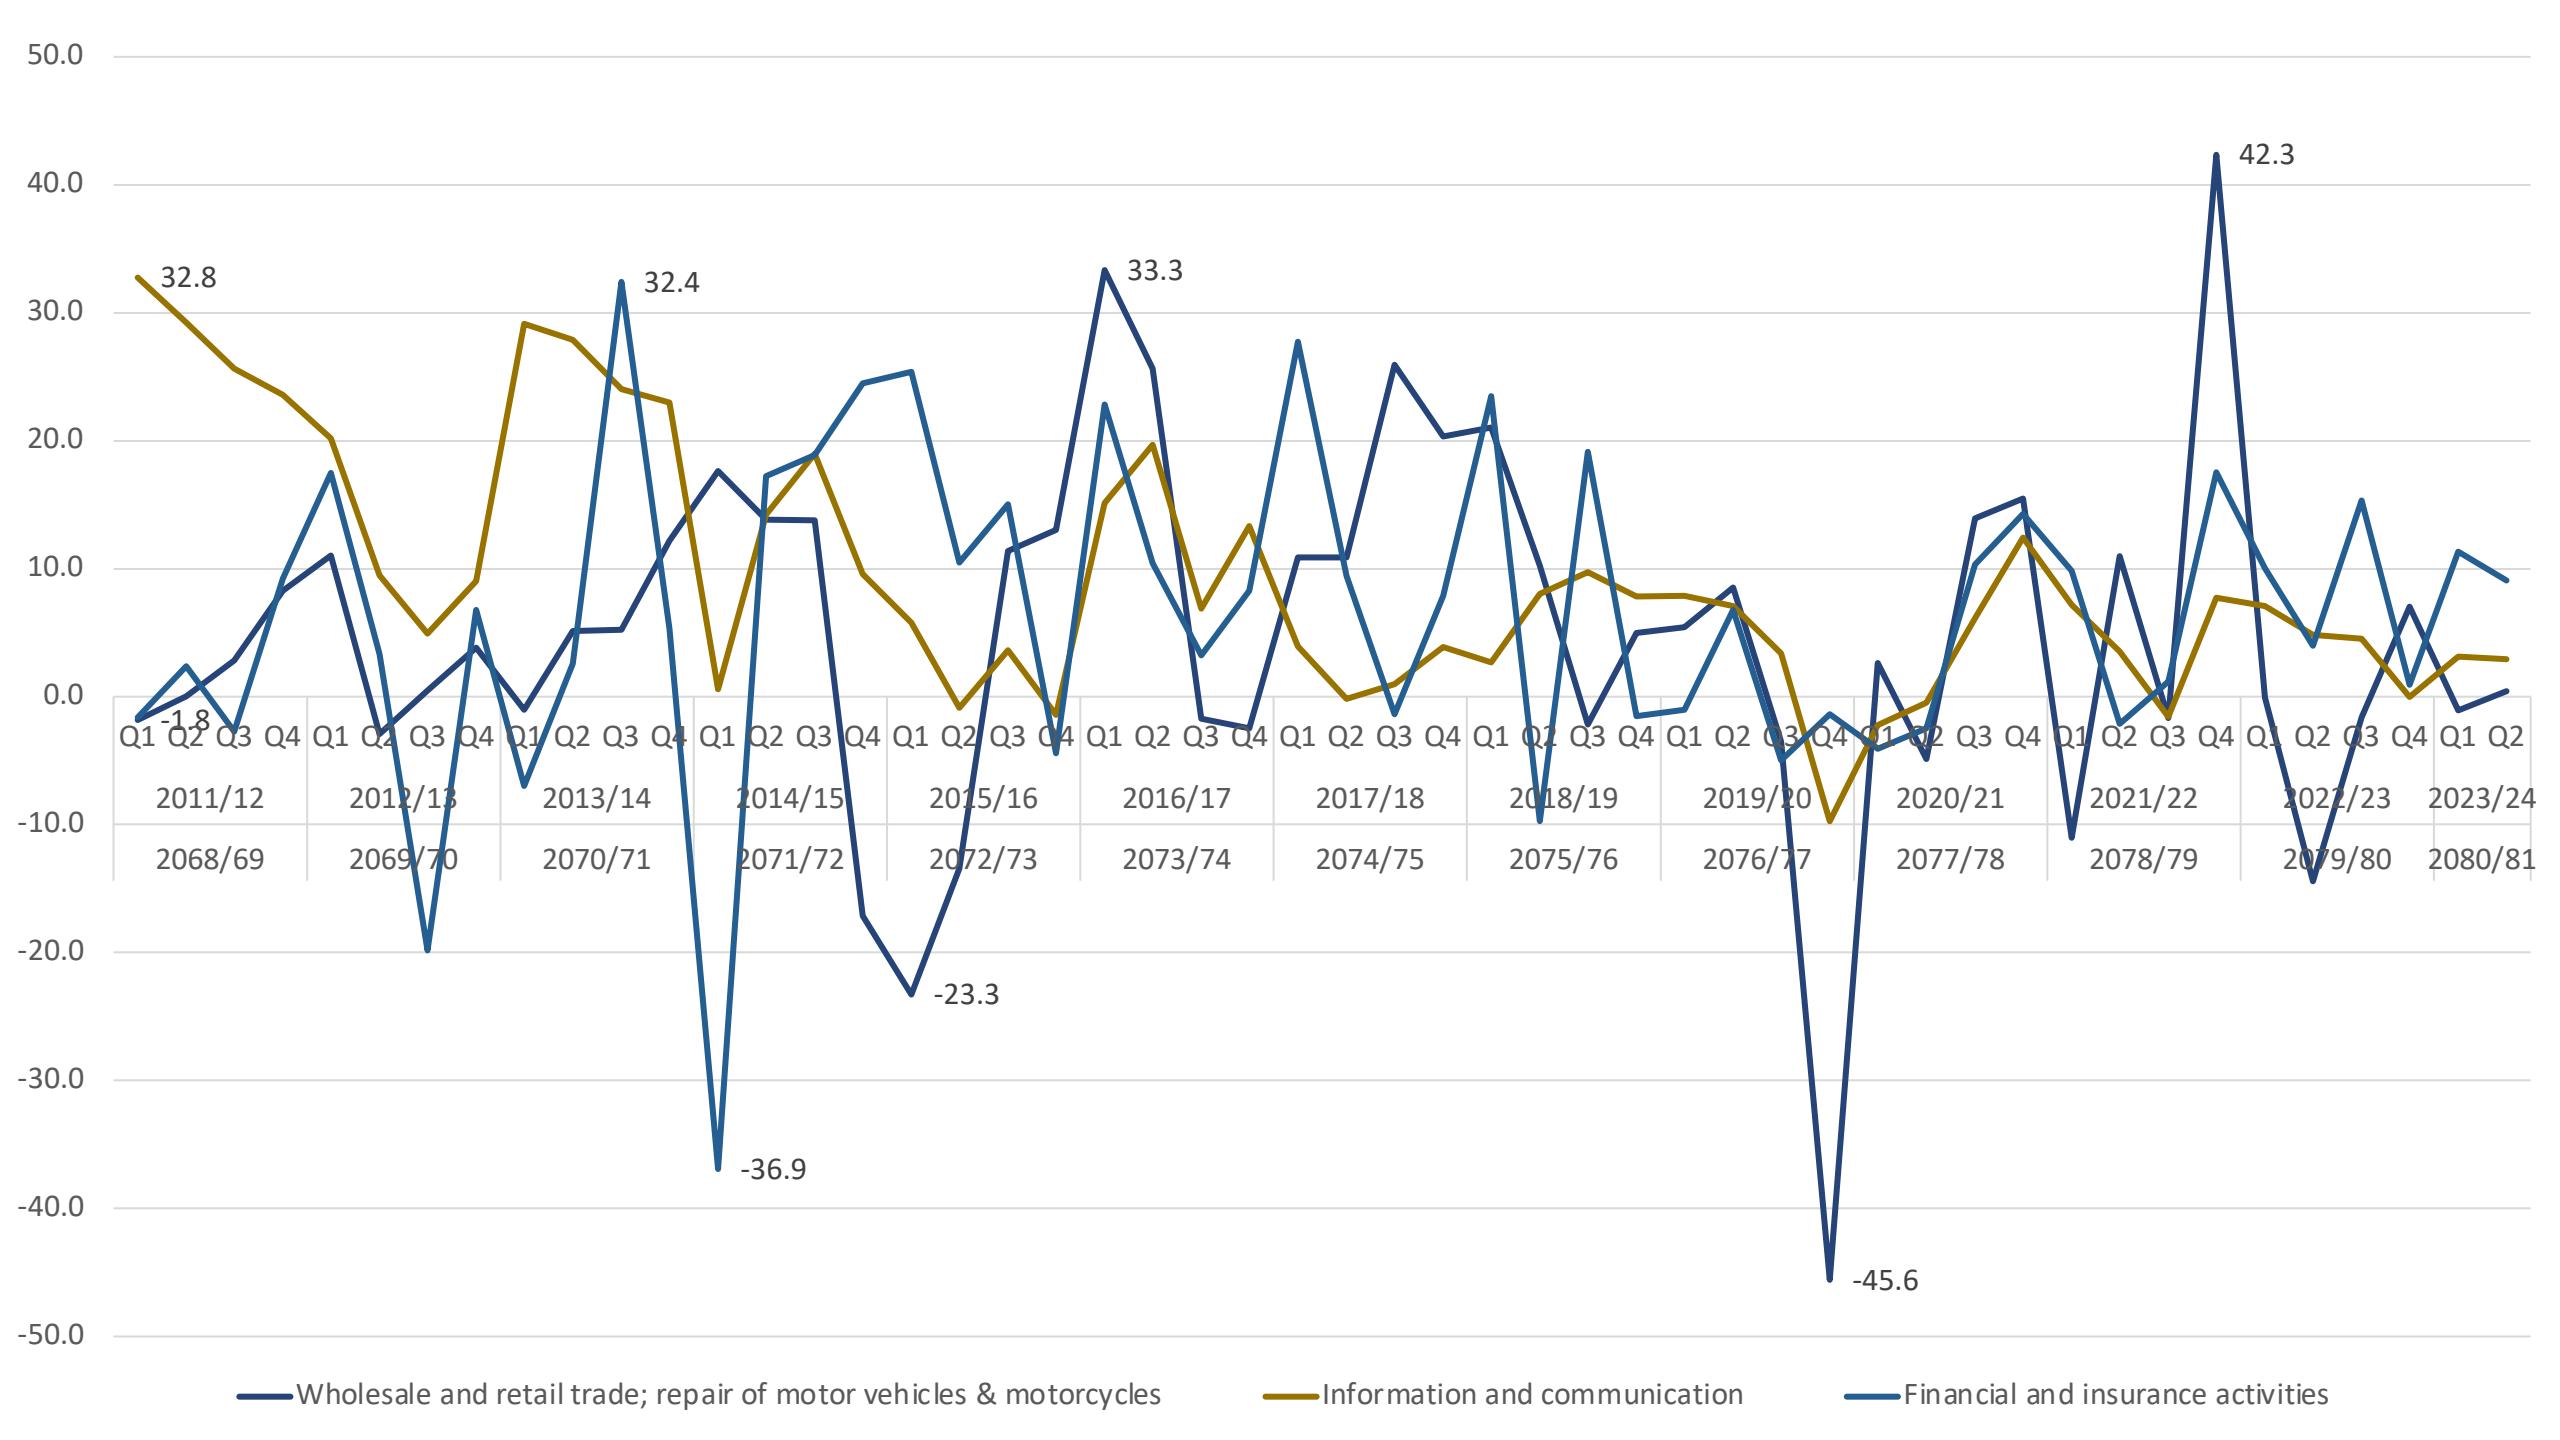

Analyzing Nepal's GDP Growth Trajectory

Quarterly Gross Domestic Product (QGDP) growth at basic price

Nepal's GDP growth trajectory displays volatility, characterized by fluctuations on both a quarterly and yearly basis.

01

Positive and Negative Growth

Throughout various quarters, the economy experiences periods of robust positive growth rates juxtaposed with instances of negative growth, demonstrating its resilience through expansion and contraction phases.

02

Earthquake Recovery:

Following initial negative growth in 2016/17, the earthquake reconstruction efforts drive increased demand, resulting in notable spikes in growth rates, particularly in Q4 of 2016/17 (13.6%), highlighting significant economic activities spurred by earthquake recovery endeavors.

03

COVID-19 Impact:

Conversely, the imposition of lockdowns and movement restrictions led to negative growth instances in Q4 of 2019/20 (-16.1%), reflecting economic contractions primarily influenced by external factors like the COVID-19 pandemic.

04

Challenges in 2022/23:

The year 2022/23 presents significant challenges, with consecutive slow growth rates attributed to trade restrictions, tight monetary policies, adherence to Working Capital Guidelines, and the collapse of several non-regulated financial cooperatives.

05

Overall Trend 2024/25:

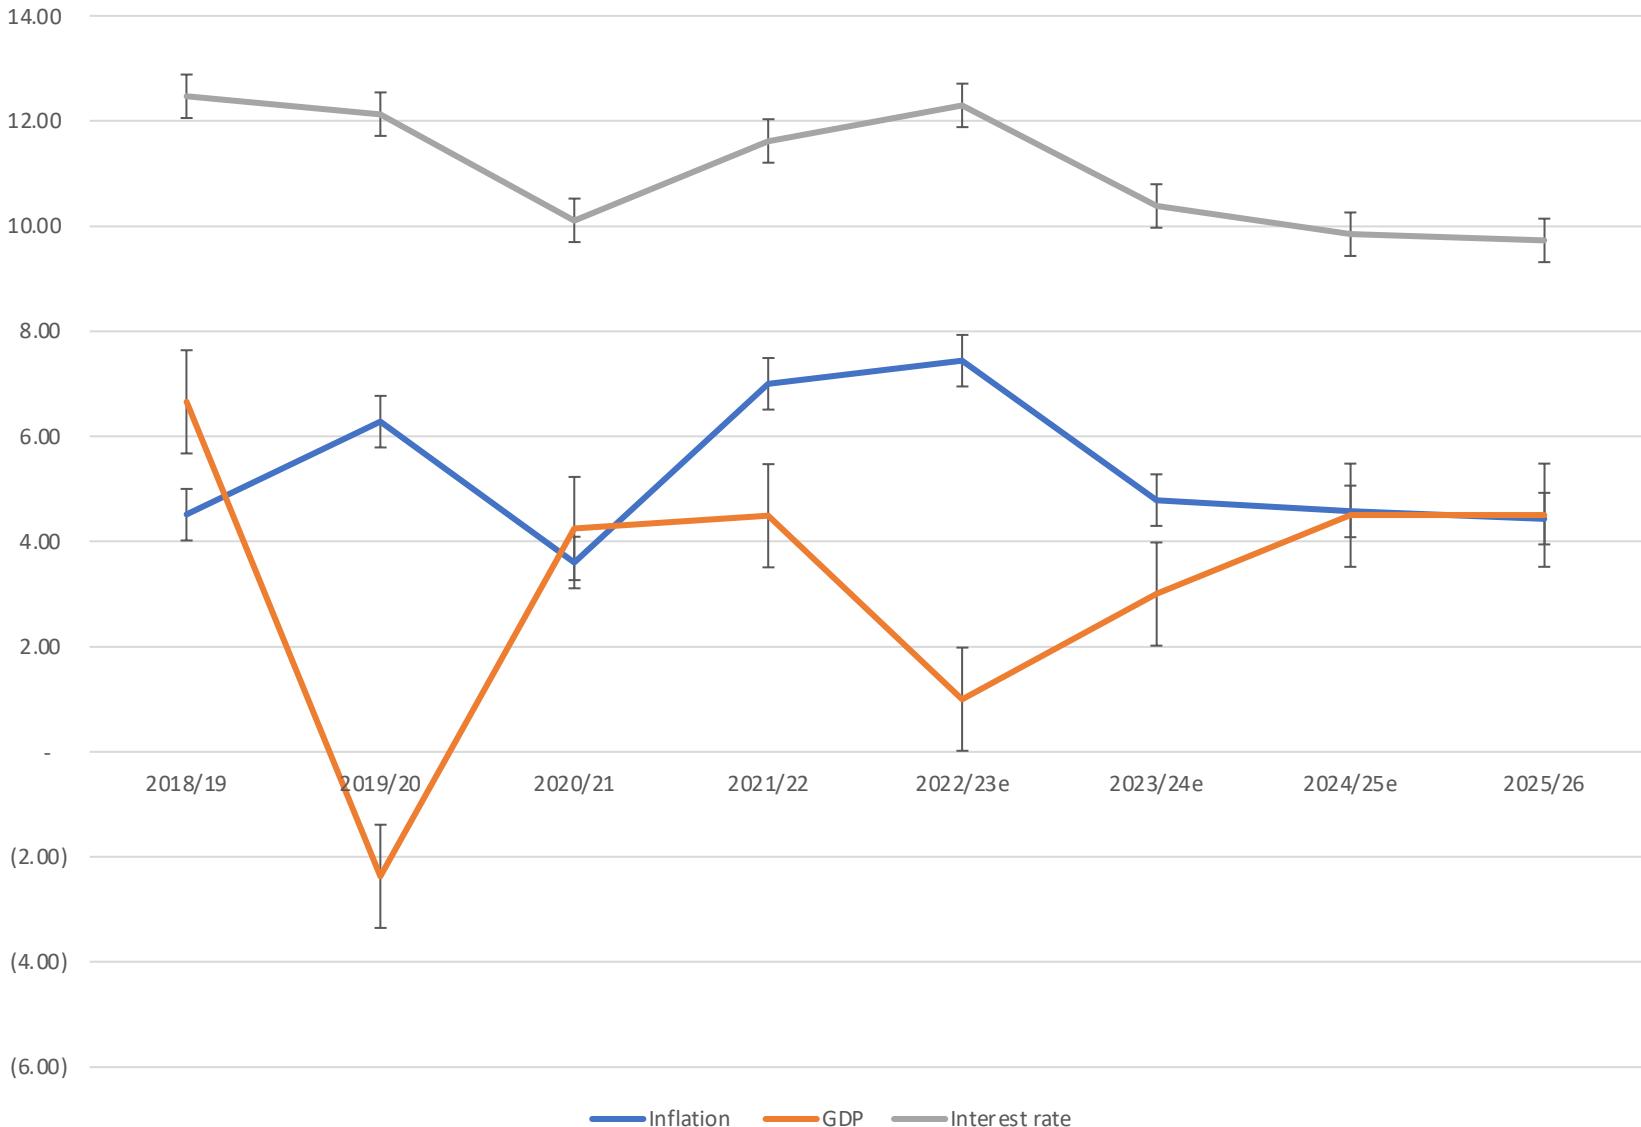

Despite the volatility, there exists a prevailing upward trajectory in GDP growth rates. As the economy embarks on a recovery path, the sustainability of this growth hinges upon the fiscal and monetary policy stance.

Nepal's GDP growth trajectory, as reported by CBS, depicts a blend of positive expansions and occasional contractions, highlighting a volatile yet generally upward trend in economic activity, despite facing significant challenges along the way.

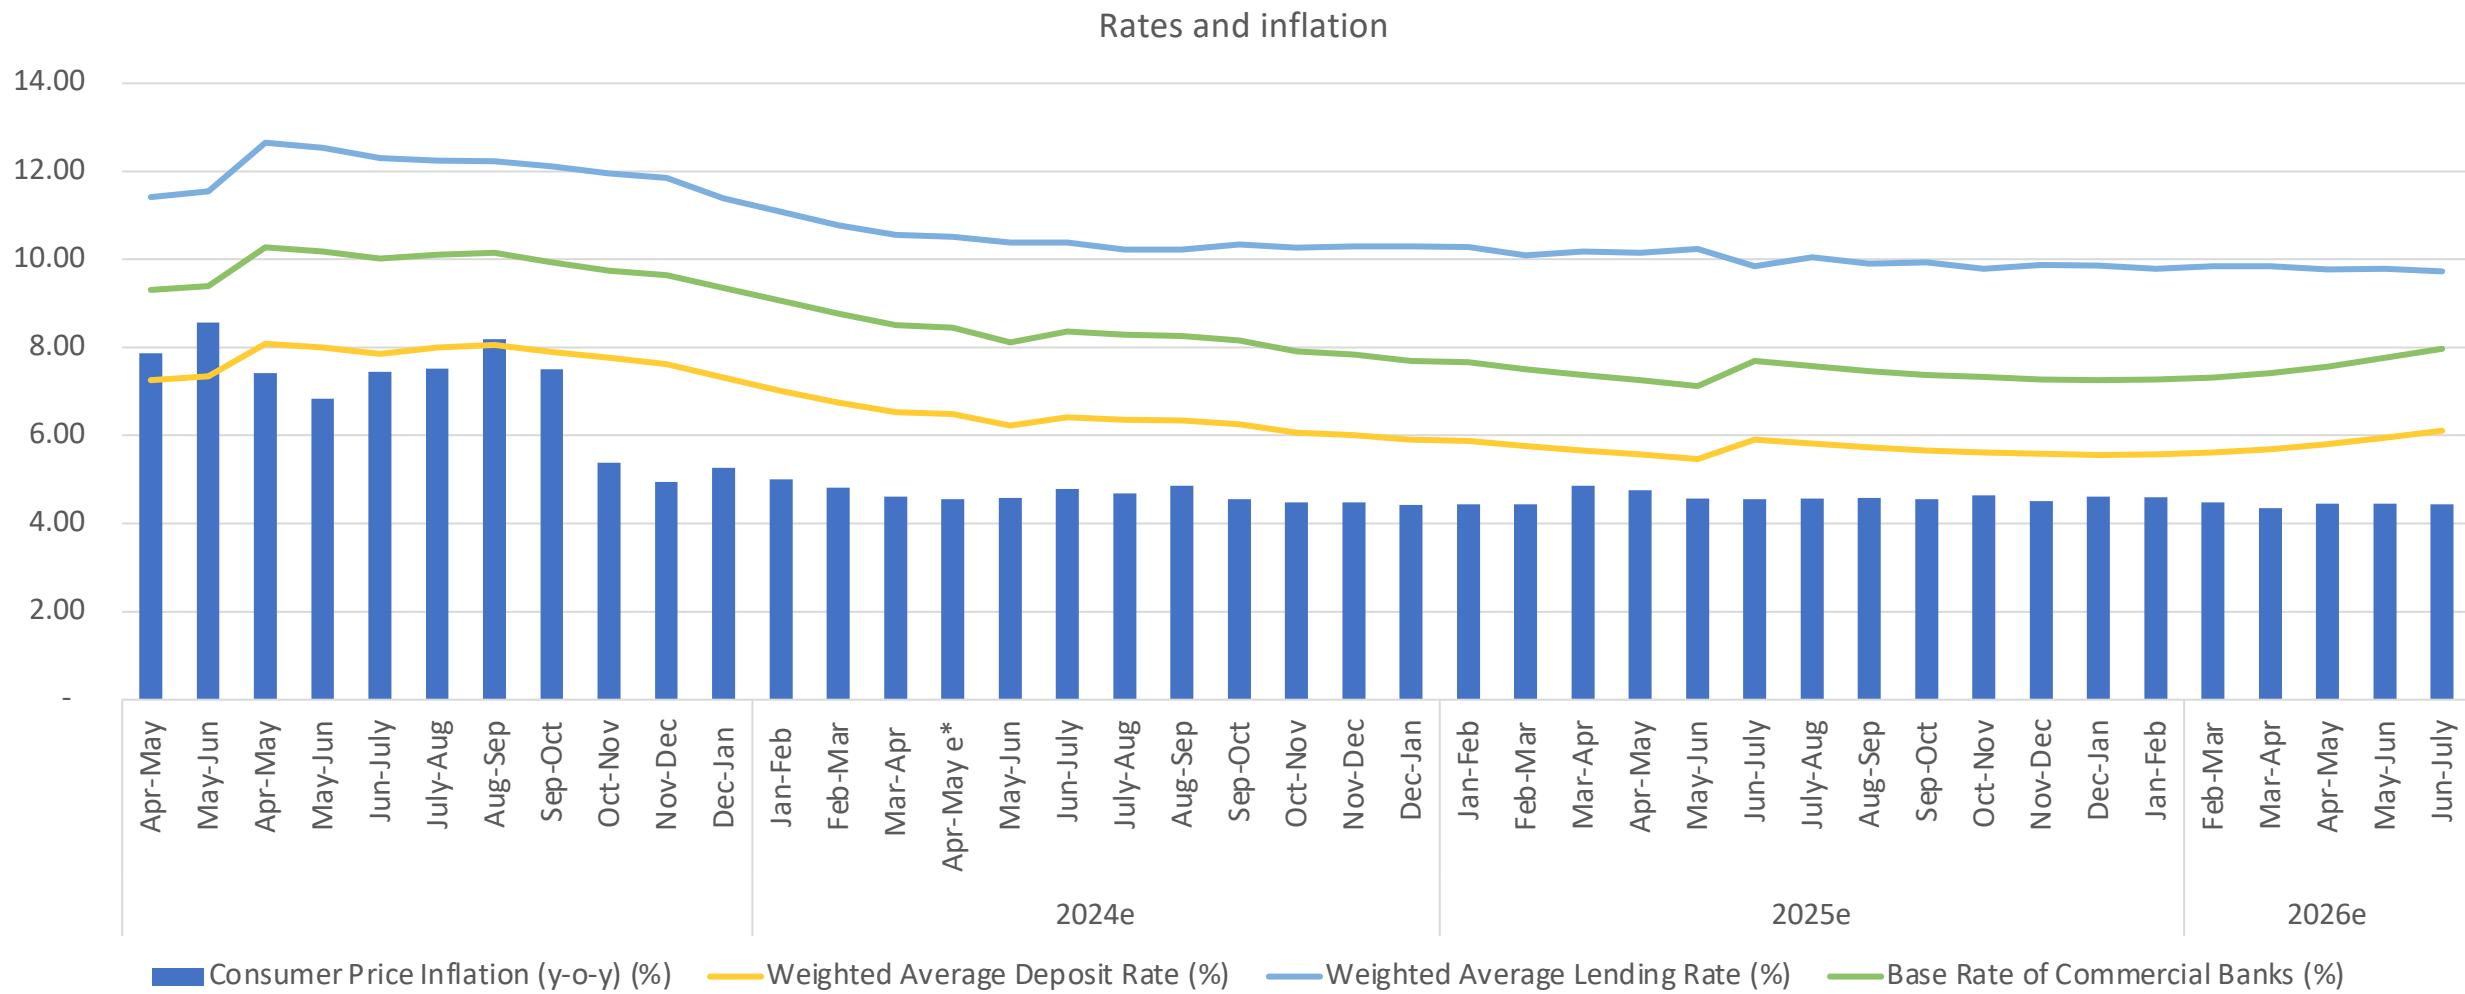

Geopolitical conditions pose significant risks, including the potential spillover effects from conflicts and the vulnerability of food and energy markets and supply chains to these factors.

Moreover, ongoing easing in financial conditions may bolster demand, potentially impeding efforts to curb inflation or even reigniting inflationary pressures.

Considering these risks and the overall uncertainty surrounding the economic outlook, NRB should remain vigilant, closely monitoring the data, particularly upcoming inflation data revisions and reports. This will enable NRB to assess the suitable course of action regarding monetary policy.

Key Economic Indicators and Outlook for the Month				
Indicator	Current Status	Projected Impact and Analysis		
		Impact	Analysis	Conclusion
Trade to GDP	As a positive sign of improved resilience in the external sector, the Department of Customs announced that the year-on-year trade deficit as a percentage of gross domestic product (GDP) saw a reduction to 20.66% by mid-May 2024, compared to the 22.86% reported in the corresponding previous year.			
Trade Deficit	<i>In the tenth month of fiscal year 2023/24, there was a marginal increase in the trade deficit, rising by \$0.01 billion to reach \$0.96 billion. However, in comparison to the same period in FY 2022/23, there was a year-on-year decrease in the trade deficit to \$10.99 billion, signaling an improvement from the \$11.69 billion recorded in the corresponding period of the prior fiscal year.</i>			
Import Pressure	Heavy reliance on imported raw materials, capital goods, and consumer products. Limited potential for export growth. Sending unskilled manpower abroad as a primary export. Limited international transportation connectivity. Untapped natural resources.			
Observations	<i>Presently, Nepal enjoys robust foreign exchange reserves, providing coverage for over 14.34 months of imports and service payments when considering the year-on-year import ratio. Encouragingly, the Nepalese economy faces no significant challenges, thanks to the decreasing prices of imported energy and food.</i> <i>Despite the shift in monetary policy from tightening to accommodative, there hasn't been a pronounced improvement in aggregate demand. However, there's optimism surrounding the expectation of continued growth in remittance inflows, offering relief to the balance of payments in the months ahead.</i> <i>While there has been a noticeable increase in the import of specific goods in the current month, the risk of a significant reversal in this trend has not seen a substantial escalation, contributing to overall stability.</i>

Import Capacity in Months and Lending Rate!

GDP and BFI's Risk Assets and Liabilities!

- *Government of Nepal must shift base year of GDP calculation 2010/11 to 2020/21 as four major event occurred after 2011 namely:*
 - *Great Gorkha Earthquake*
 - *Trade embargo*
 - *Government structure*
 - *Covid-19.*
- *Shifting of the base year will sufficiently provide new horizon for policy design and response.*

GDP to Deposit and Loan and Advances

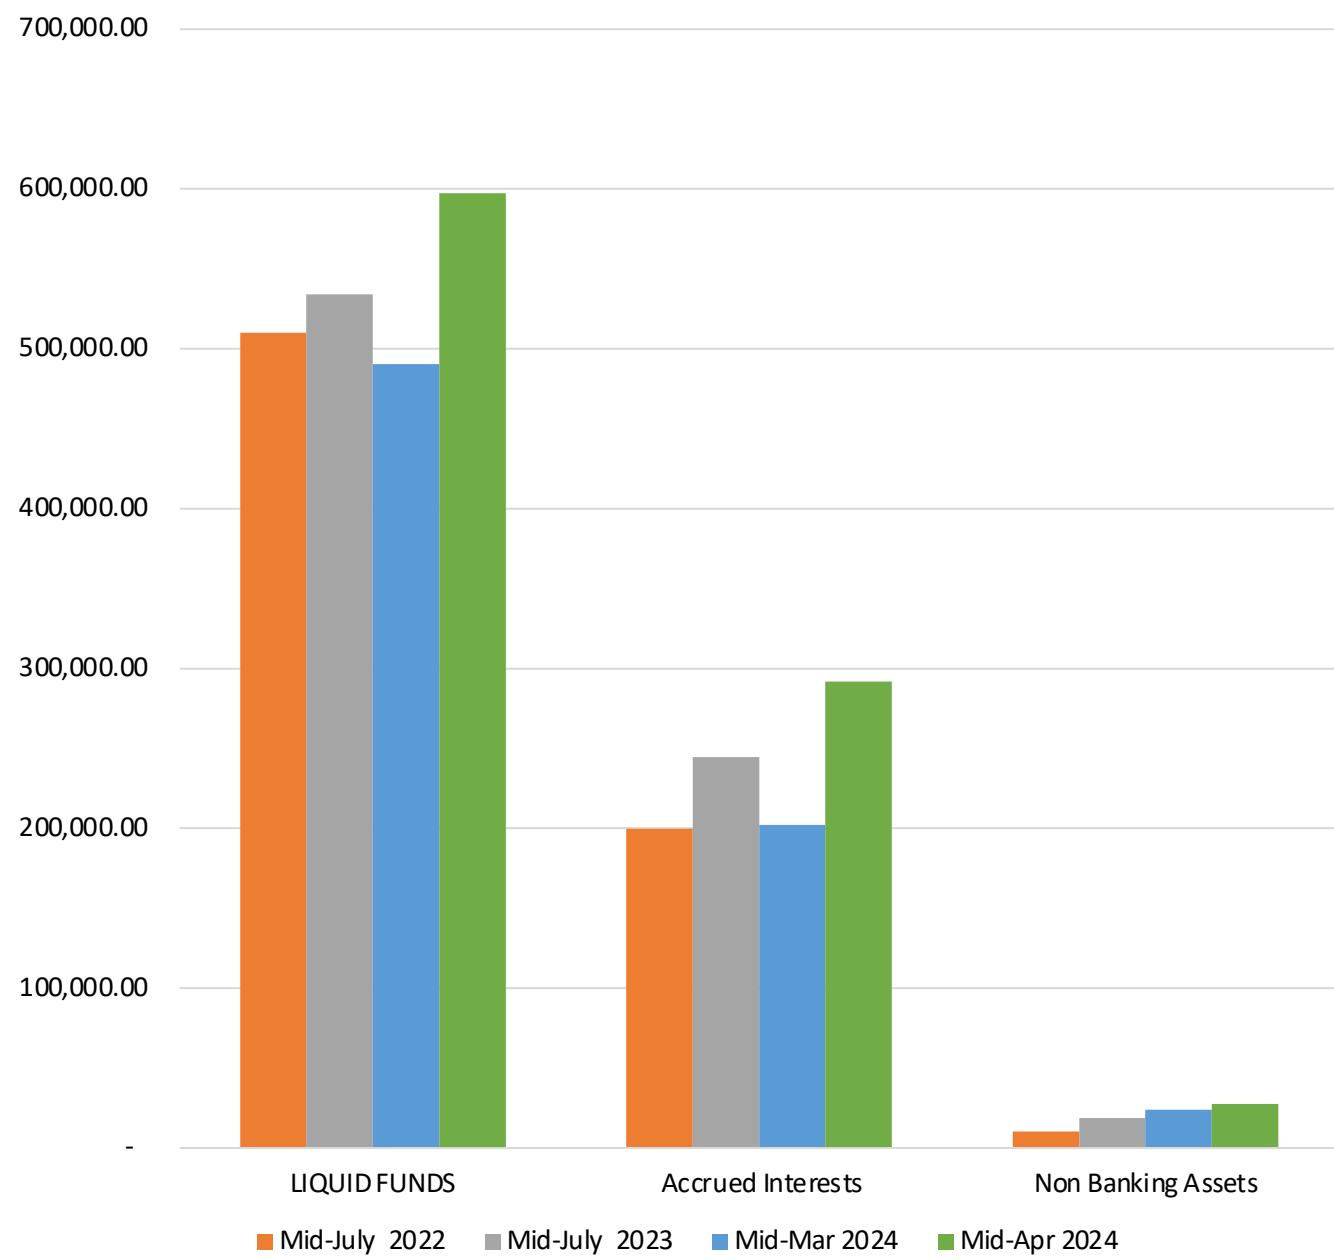

Financial Sector highlights

3

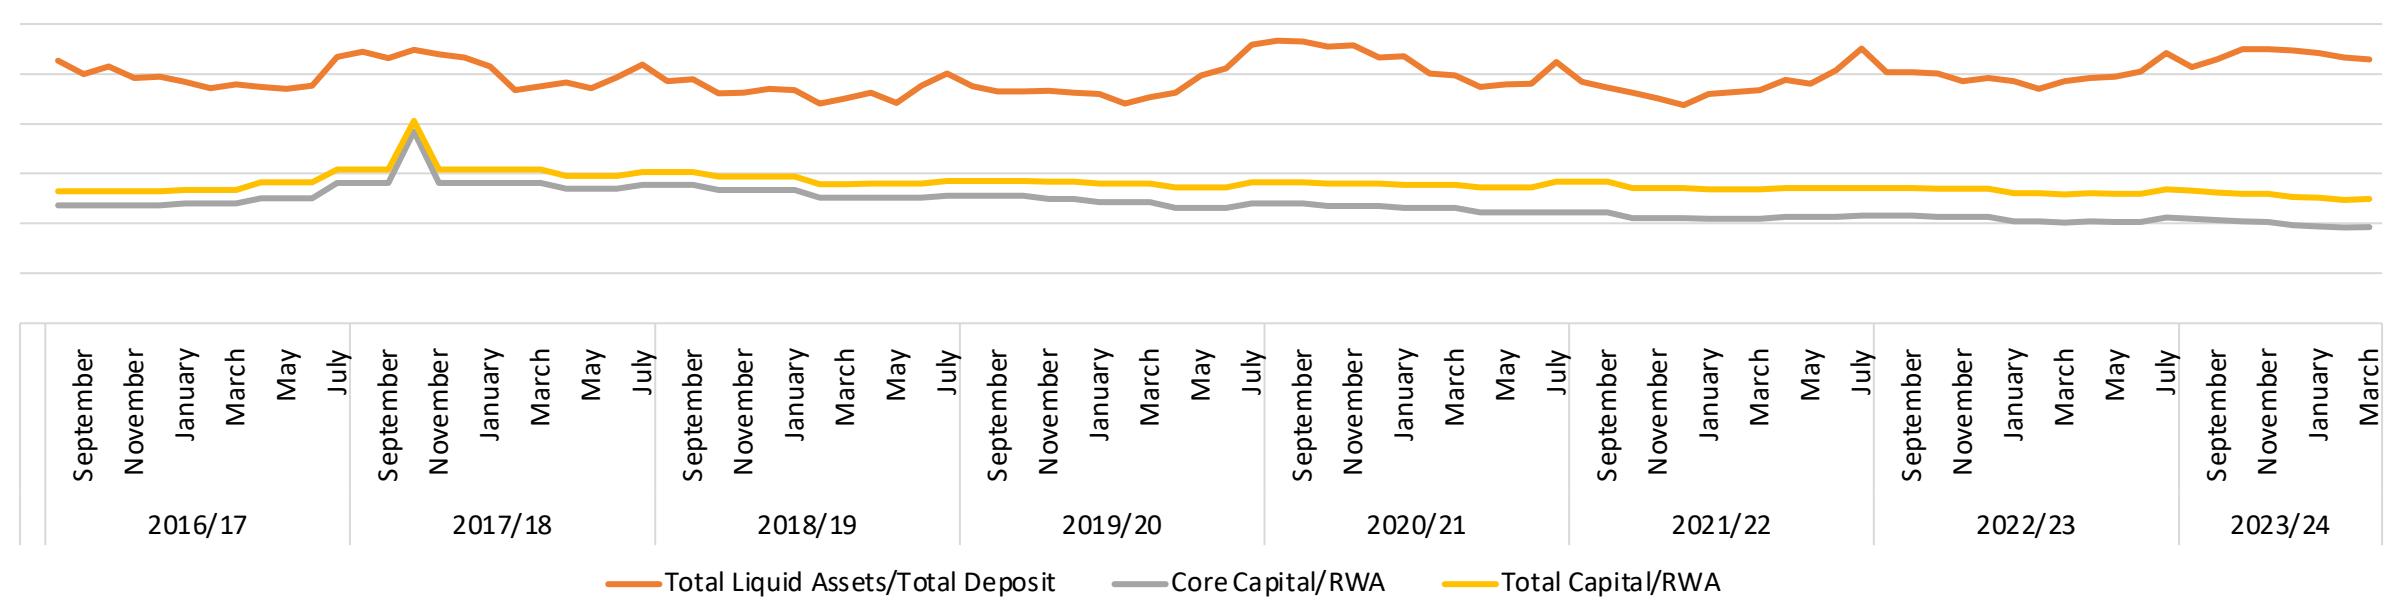

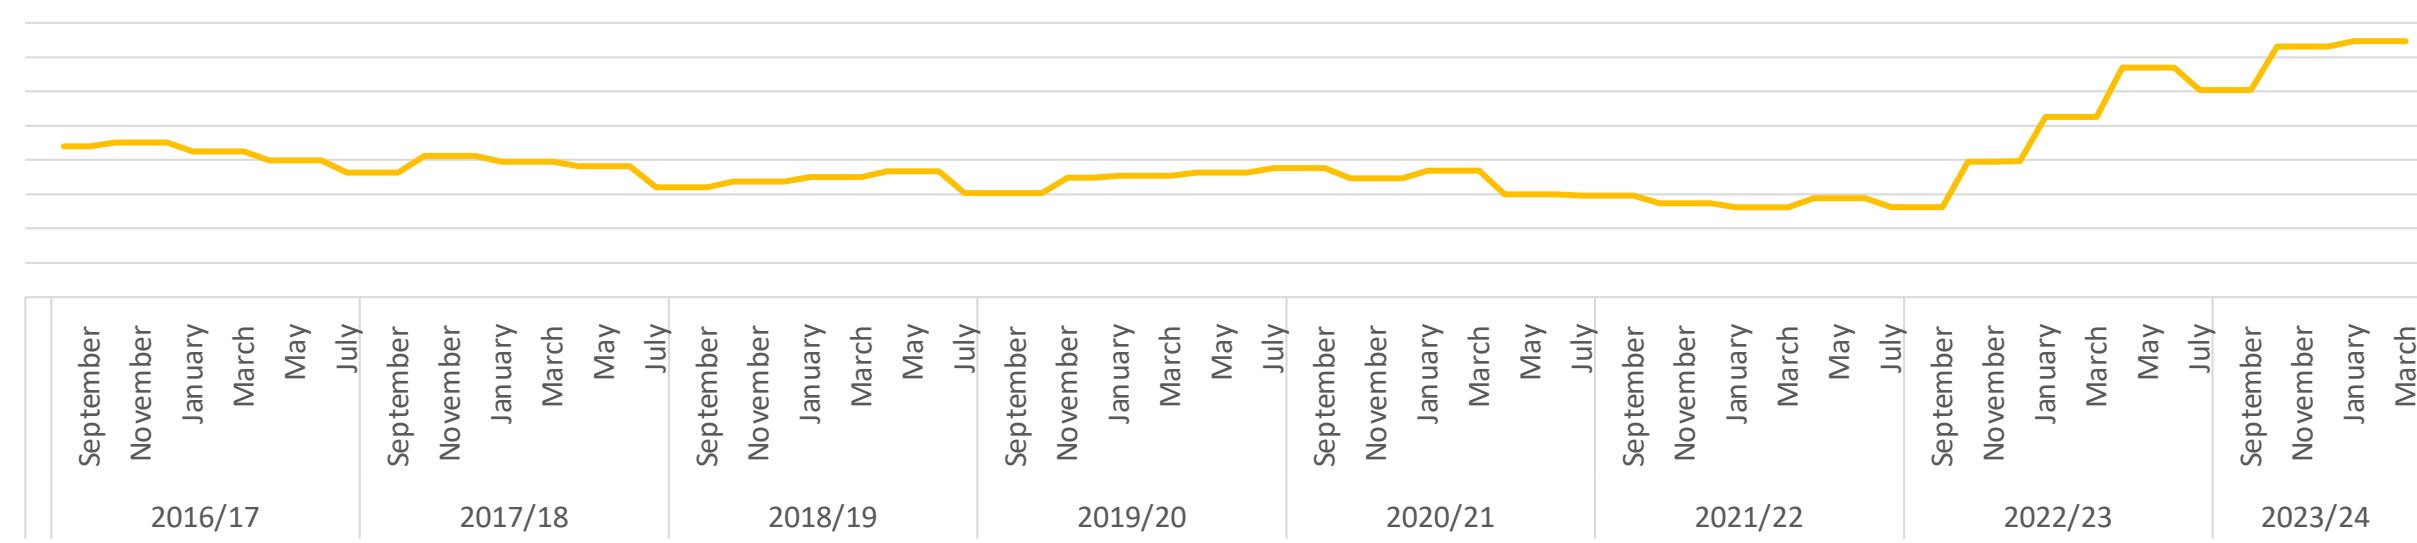

Addressing the mounting challenges of increasing accrued interest, non-banking assets, and problem loans presents a daunting moment for financial institutions. These issues threaten the stability and viability of the banking sector.

Our proactive measures to tackle the hurdles posed by rising accrued interest, non-banking assets, and problem loans are insufficient to guarantee a secure financial future. While the restructuring facility provided by NRB, allowing for the capitalization of accrued interest up to 90% with a nominal 10% interest on cash, has provided temporary relief, it has merely postponed the inevitable burden of accrued interest. Moreover, the conversion of 90% interest into a separate loan mechanism has artificially inflated loan growth, masking the underlying issues. Excluding the interest capitalization, the growth in fresh loans remains alarmingly modest.

This highlights the gravity of our situation. Without significant reform and more effective solutions, we risk falling short of our objectives and facing a precarious financial landscape.

NPL/ Total Loan

Inadequate capital, insufficient liquidity, weak risk management practices, and cybersecurity failures do more than harm individual banks—they threaten the entire system's stability. Supervision aims to apply heightened standards to firms with the greatest potential for systemic risk, but accurately identifying these firms in advance is an inexact science fraught with uncertainty.

The Nepal Rastra Bank's (NRB) supervisory function is supposed to underpin a safe and sound banking system. However, as the banking system evolves, NRB's supervision often struggles to keep pace. NRB must continuously explore new models of financial risk, yet this is easier said than done. Bringing together multiple perspectives to challenge supervisory judgments and building organizational frameworks to institutionalize this practice is a complex and daunting task. Supervision must adapt appropriately when NRB detects changes at a firm or within the financial sector, especially in times of rapid innovation and technological change—a challenge that is often underestimated.

Furthermore, NRB must acknowledge its limitations. The recent failure of cooperatives starkly revealed regulators' shortcomings, highlighting that supervision can lack the necessary speed, force, and agility, particularly when banks expand rapidly or take on new risks. While NRB has since been proactive in addressing these issues, this work is slow and fraught with challenges. Although supervisors around NRB have stepped up to the task, the true measure of their efforts will be judged by the market, which remains skeptical.

Economic Performance

Outlook		Outlook																						
Corporate performance	<p>Following the accommodative stance adopted by the NRB, there is a promising outlook for a substantial decrease in the population of MSMEs experiencing negative economic profitability. This positive trend is likely to contribute to a reduction in default rates.</p> <p>Additionally, a considerable portion of large corporations has witnessed notable enhancements in the return on invested capital (ROIC), accompanied by a rapid decline in the weighted average cost of capital (WACC). As a result, there is a lessened pressure on sustaining a favorable ROIC for these corporations.</p>	<p>Anticipated positive trends indicate that Banking and Financial Institutions (BFIs) are poised for increased profitability in the fiscal year 2025/26. This optimistic outlook is primarily fueled by the favorable impacts arising from the availability of loan reconstruction and rescheduling facilities. Despite facing additional tax burdens and challenges associated with a low-interest margin environment and limitations on non-interest income, the sector is foreseen to witness an upturn in profitability, particularly driven by the reduction in Non-Performing Assets (NPA). As of present, the Non-Performing Loans (NPLs) and Loan Loss Provisions (LLP) of Banking and Financial Institutions (BFIs) amount to \$1.46 billion and \$1.68 billion, correspondingly.</p>																						
Working Capital financing	<p>Under the Working Capital financing guidelines, borrowers are likely to confront persistent obstacles when seeking to inject new equity into their operations. The prolonged working capital cycle will impede borrowers' capacity to finance their operational needs internally. This protracted cycle renders the injection of fresh equity impractical, given the inadequacy of internal resources. As a result, the enforcement of these updated working capital regulations is anticipated to yield adverse consequences, potentially hampering industrial growth and unsettling the equilibrium in supply chain management. Sector-specific adjustments remain pending, adding to the prevailing sense of pessimism.</p>	<p>Exercise caution as Non-Performing Loans (NPLs) are projected to remain at 3.90% by the end of July 2024. Despite this estimation, the prevailing uncertainty is anticipated to exert a notable influence on both bank capitalization and profitability, potentially leading to cascading effects in various sectors.</p>																						
Household debt Regrouped	<p>While the corporate sector bears a substantial portion of the debt burden, it's encouraging to highlight the positive trend of a significant increase in household debt. It's worth noting that, even with this growth, household debt remains below the levels observed in advanced economies.</p>	<p>Household debts in \$ million</p> <table> <tbody> <tr> <td>Residential Personal Home Loan (Up to Rs. 20 million)</td> <td style="text-align: right;">3,730.49</td> </tr> <tr> <td>Loan of 5M or and above without specified purpose</td> <td style="text-align: right;">451.05</td> </tr> <tr> <td>Margin Nature Loan</td> <td style="text-align: right;">659.24</td> </tr> <tr> <td>Hire Purchase Loan</td> <td style="text-align: right;">276.37</td> </tr> <tr> <td>Credit Card</td> <td style="text-align: right;">35.63</td> </tr> <tr> <td>Education Loan</td> <td style="text-align: right;">359.99</td> </tr> <tr> <td>Gold/Silver</td> <td style="text-align: right;">430.32</td> </tr> <tr> <td>Guarantee Bond</td> <td style="text-align: right;">525.24</td> </tr> <tr> <td>Fixed A/c Receipt</td> <td style="text-align: right;">320.19</td> </tr> <tr> <td>Total</td> <td style="text-align: right;">6,788.51</td> </tr> <tr> <td>% of total Loan</td> <td style="text-align: right;">17.36%</td> </tr> </tbody> </table>	Residential Personal Home Loan (Up to Rs. 20 million)	3,730.49	Loan of 5M or and above without specified purpose	451.05	Margin Nature Loan	659.24	Hire Purchase Loan	276.37	Credit Card	35.63	Education Loan	359.99	Gold/Silver	430.32	Guarantee Bond	525.24	Fixed A/c Receipt	320.19	Total	6,788.51	% of total Loan	17.36%

Major Risks/Impact	High	Medium	Low	Remarks
Excessive capacity, supply constraints, and intense competition within the manufacturing sector could potentially have adverse repercussions on asset quality.	✓			Deteriorate
Substantial surges in the market prices of vital raw materials, energy, or transportation, along with supply disruptions, may negatively impact the performance of the industrial sector. This, in turn, could intensify the pressure on short-term loan demand and exacerbate financing mismatches due to working capital guidelines.	✓			Deteriorate
A heavy reliance on imported raw materials, capital goods, and consumer products can potentially strain the Balance of Payments. Additionally, a supply-demand mismatch could lead to a deterioration in the asset quality of Banking and Financial Institutions (BFIs).	✓			Deteriorate
Variations in the current market interest rates applicable to loans and debts, both within the financial market and the overall financing landscape, have the potential to negatively impact business operations and financial health, leading to a decline in asset quality. With credit growth remaining subdued due to sluggish domestic demand, it is expected that many market lending rates will be adjusted downward. This could also lead to a reduction in yields on government securities.	✓			Deteriorate
The profitability of the banking sector continues to face challenges, including a low-interest margin environment, limitations on non-interest income, and a rising trend in corporate payment defaults. These factors pose challenges to the successful implementation of NFRS 9.	✓			Deteriorate
The asset quality of Banking and Financial Institutions (BFIs) may experience a decline due to microeconomic vulnerabilities. Additionally, there is a potential for a significant increase in Income Tax liabilities in the event of changes to tax laws and regulations or unfavorable interpretations and inconsistent enforcement, particularly in transactions involving bargain pricing, share premiums, FPOs, and ownership transfers, among other factors.		✓		(BFI paid \$ 92 million in taxes for the FPO bargain pricing)
Variations in the exchange rate between the Nepalese Rupee and the U.S. dollar have the potential to influence the market prices of raw materials.	✓			Deteriorate
Global supply constraints have the potential to negatively impact both operations and financial stability. An inability to effectively manage supply and distribution gaps could disrupt economic activities.	✓			Deteriorate

Risk Matrix

	Condition	Related effect		Risk
Low saving/Investment	Decrease wholesale and retail operations.	Aggregate demand	Decline	High
	Enhancing foreign exchange reserves and experiencing a substantial inflow of remittances	Pressure on BOP	Decline	Low
	Corporate cash recovery.	Firm Investment	Decline	High
	Loss of disposable saving	Failure of non-regulated financial institutions (Cooperatives)	Increase	High
Post-Covid	Increasing Tourism activities	Occupancy at Hotel and retail restaurant	Increase	Low
	Outmigration	Demand for worker	Increase	Low
War and conflicts	Increasing commodities prices	Import Bill	Increase	High
	Increasing Energy Price	Cost of production	Increase	High
Interest Rate Outlook	Pressure on Liquidity	improvement of consumer's demand	Stable	Low
FDI inflow Outlook	Demand for liquidity in host countries	Flow of FDI	Low	High
Level of NPL	Reconstruction and rescheduling	Pressure on Capital of BFIs	Increase	High
Demand for Working capital	Decreasing cost of borrowing and inputs	Reducing cost of production	Stable	Moderate
Inflation outlook	Lower commodity price	Lower consumer demand	Decline	Moderate

Way forward

	SPECIFIC MEASURES/WORKABILITY	TIME FRAME	IMPLEMENTABILITY	PRIORITY ORDER
Risk Assets management	<i>The third review of the working capital guidelines should incorporate sector-specific requirements, given that the second amendment does not adequately address them.</i>	Immediate	Possible	High
	<i>Downward revision of policy rates and continuation of Refinancing for another one year</i>	Immediate	Possible	Medium
	<i>Allow assets purchase and allow Peer-to-peer lending and invoice discounting</i>	Immediate	Possible	High
	<i>Review Risk Assets pricing policy</i>	Immediate	Possible	High
	<i>Design and implement a second-phase recovery and stimulus package for agriculture, industries and services</i>	Immediate	Possible	High
	<i>Review base rate calculation method to include all costs</i>	Immediate	Possible	High
	<i>Implement mandatory taking Permanent Account Number (PAN) for all size loan.</i>	Immediate	Possible	High
Liquidity Management	<i>Replace CD ratio by Net-Liquidity Ratios</i>	Immediate	Possible	High
	<i>Review of Saving Deposit interest rate policy</i>	Immediate	Possible	High
	<i>Review of SLF policy, and Assets purchase policy of NRB</i>	Immediate	Possible	High
	<i>Discourage cash transactions and promote electronic payment system by focusing on digitization & Fin-tech and reducing the cost of transactions</i>	Immediate	Possible	High

Way forward

	Specific measures/Workability	Timeframe	Implementability	Priority order
Legal reform	<i>The proposed amendment in the Banking and Financial Institutions Act (BAFIA) has taken strides towards segregating banking and business activities. However, it is advisable to implement this segregation in a phased manner. Categorizing larger family members as related parties might encroach upon individuals' fundamental rights. Hence, the amendment should revisit this aspect.</i>	Immediate	Possible	High
	<i>Establish an exit policy aimed at balancing the ownership structure to enhance transparency and governance.</i>	Medium-term	Possible	High
	<i>Implement separate policies to supervise systematically important banks.</i>	Medium-term	Possible	High
MSMEs	<i>Initiate steps to have single definition of MSMEs across all regulators. Increase coverage of credit guarantees on MSME loans.</i>	Immediate	Possible	High
	<i>Introduce policy to scale-up agriculture base MSMEs, which can immediately create employment and substitute imports</i>	Immediate	Possible	High
	<i>Introduce E-commerce and digital solutions to increase access short-term bridge loans to micro and small businesses, and digital payments.</i>	Short-term	Possible	High
Risk Assets	<i>Initiate a sector-specific analysis and take proactive measures to conduct a swift assessment of Banking and Financial Institutions (BFIs) in order to comprehend the long-term implications of the ongoing crisis.</i>	Short-term	Possible	High
Forex	<i>Sustain the credibility of the exchange rate peg by periodically reviewing foreign exchange policies and directives.</i>	Long-term	Possible	High

Profitability of BFIs

(Exchange Factor \$ 1 = NPR 130)

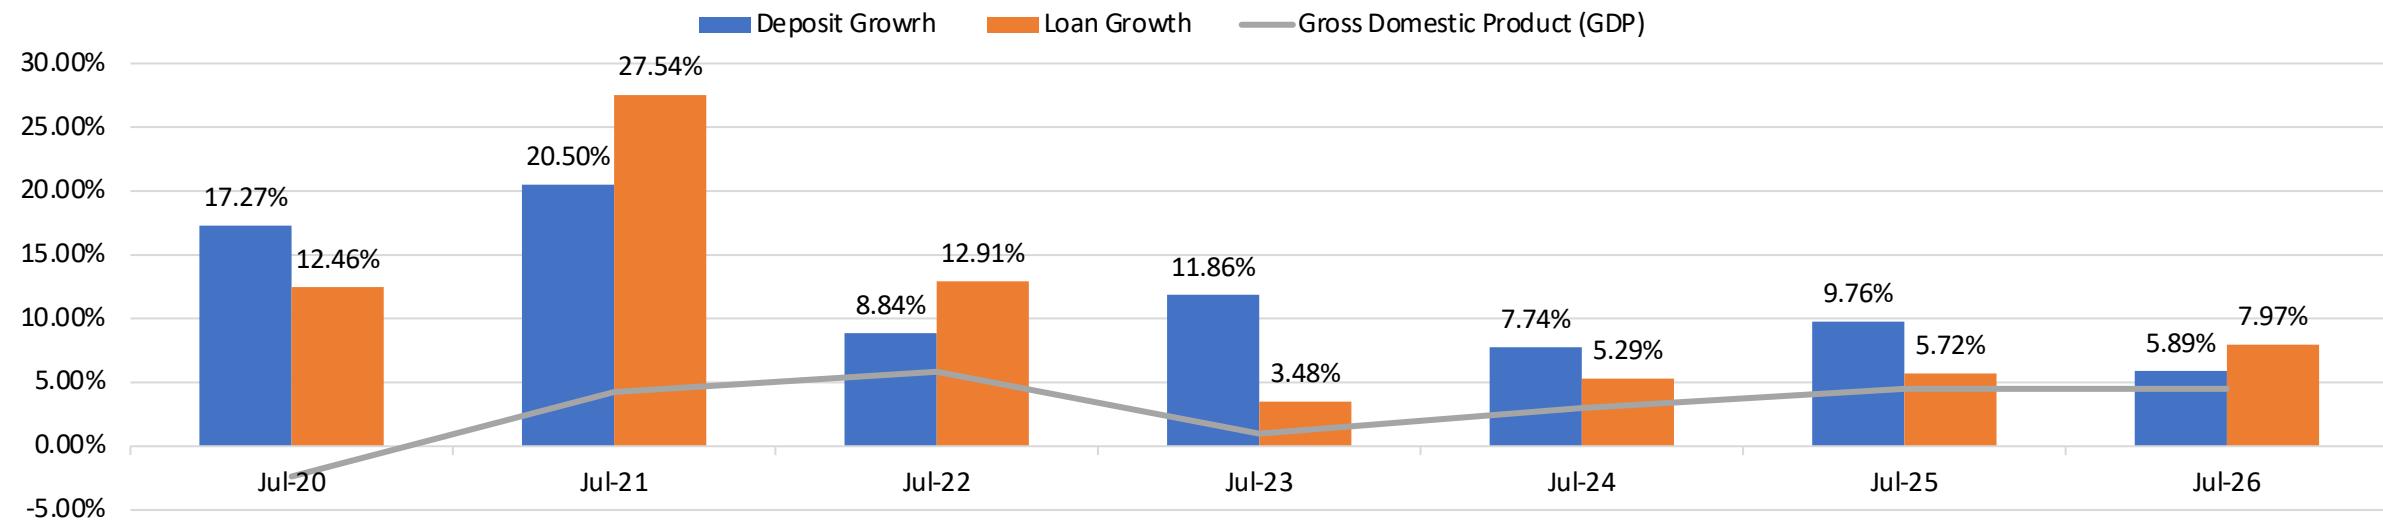

The tax associated with Bargain gain and FPO is anticipated to strain the already stressed capital of financial institutions, resulting in an expected reduction of Rs 60 billion or more in their lending capacity.

The question arises: should the tax payment related to bargain gains and FPO be treated as an expense on the profit and loss statement, or should it be deducted from reserves? Nonetheless, three alternative strategies are available:

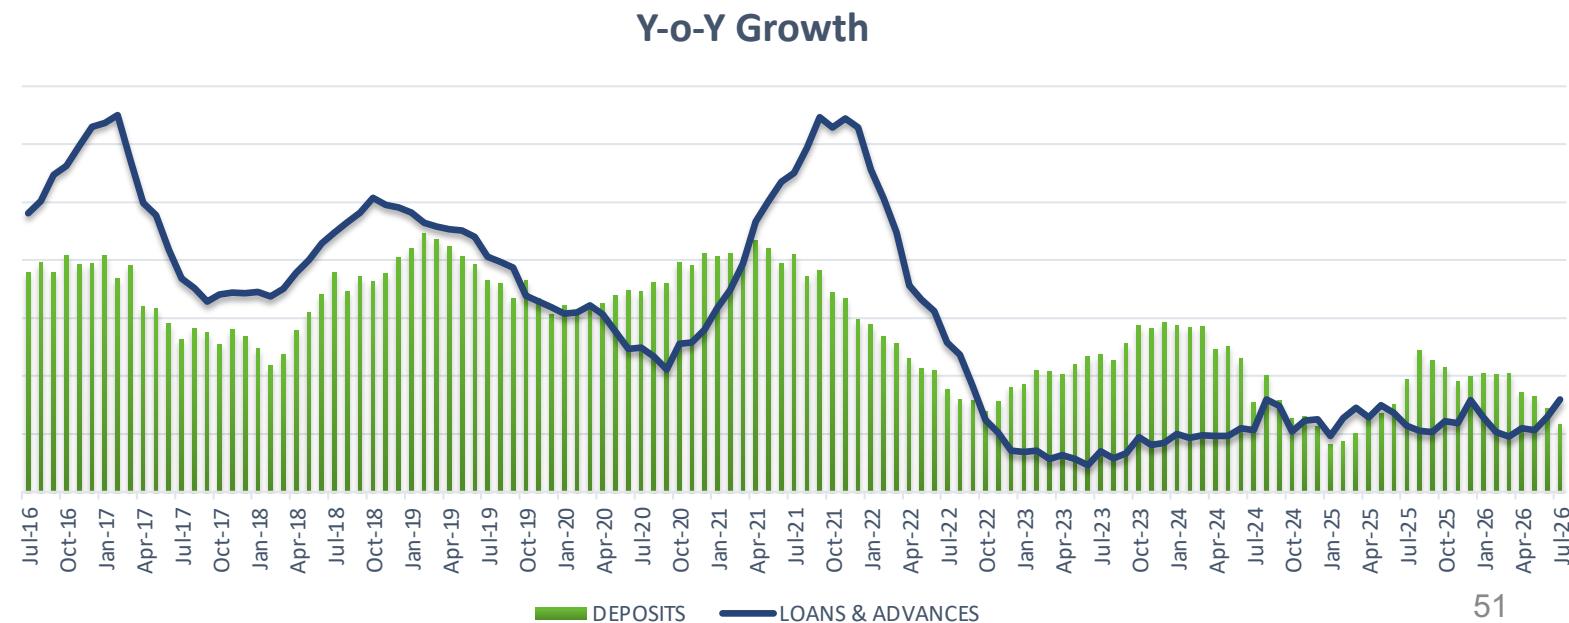

1. NRB could explore allocating it to a reserve, particularly since the capital movement is not a result of regular business operations. Clear directives should be rolled out, accompanied by measures to mitigate the impact on lending capacity (or on CAR). Importantly, this option would have no bearing on the profit and loss statement.
2. If NRB chooses to charge it to the profit and loss statement, it should allow BFIs to spread the impact over five years. This strategic move aims to protect both lending capacity and profitability. NRB should coordinate with the Accounting Standards Board and ICAN.
3. Alternatively, BFIs might be permitted to reduce capital on a pro-rata basis. It needs a lot of regulatory reform.

The prudent approach would be to charge it to reserves. In this scenario, prompt decision-making is imperative to ensure effective financial and fiscal stability.

Annual Loan and Deposit Growth and LLP

	Amount in USD Million	Incremental LLP
Particulars	Incremental LLP	Incremental LLP
Loan loss Provision	143.60	18.26%

2024/25's Budget Should Prioritize

Nepal requires an immediate economic rescue plan to revive its economy.

Nepal requires an immediate economic rescue plan to revive its economy.

The plan should aim to restore fiscal balance, ensure financial stability, and control inflation.

<i>Importance of Fiscal Balance</i>	<p><i>Fiscal balance is crucial for sustainable economic growth. It involves managing government revenues and expenditures to prevent budget deficits. Ensuring fiscal balance fosters investor confidence and supports long-term economic stability.</i></p>
<i>Ensuring Financial Stability</i>	<p><i>Financial stability is essential for a robust economy. It involves maintaining stability in the banking sector, preventing financial crises, and ensuring smooth credit flows. Upholding financial stability boosts investor trust and encourages economic investment.</i></p>
<i>Anchoring Inflation</i>	<p><i>Controlling inflation is vital for economic health. Excessive inflation erodes purchasing power and destabilizes the economy. Anchoring inflation to a reasonable limit supports price stability and fosters economic growth.</i></p>
<i>Components of the Emergency Economic Plan</i>	<p><i>Fiscal Measures: Implementing prudent fiscal policies to manage government finances and reduce budget deficits. Financial Sector Reforms: Strengthening regulatory frameworks and enhancing oversight to ensure stability in the banking sector. Monetary Policy Actions: Implementing measures to control inflation through appropriate monetary policy tools.</i></p>
<i>Immediate Action Steps</i>	<p><i>Assessing the current economic situation and identifying priority areas for intervention. Formulating and implementing policies swiftly to address fiscal imbalances, ensure financial stability, and control inflation. Collaboration between government agencies, financial institutions, and international partners to implement the plan effectively.</i></p>
<i>Benefits of the Plan</i>	<p><i>Stimulating economic growth and creating employment opportunities. Restoring investor confidence and attracting foreign investment. Enhancing the overall economic resilience of Nepal in the face of future challenges.</i></p>
<i>Conclusion</i>	<p><i>An emergency economic plan is essential for Nepal to overcome its economic challenges. By maintaining fiscal balance, financial stability, and controlling inflation, Nepal can jump-start its economy and pave the way for sustainable growth and development.</i></p>

01

Economic Recovery

- ❑ Facilitate the resurgence of agriculture, tourism, industry, construction, and other businesses impacted by the ongoing crisis by extending regulatory forbearance.
- ❑ Revamp the tax system to enhance revenue generation through asset monetization. Strengthen market oversight, inspection, and supervision to bolster regulatory efforts. Additionally, advocate for financial sector consolidation to fortify stability and resilience.

02

Qualitative and Practical Education

- ❑ Implementing a qualitative and pragmatic education system while leveraging information technology to its fullest potential. Strengthening university capabilities to foster industry engagement and cultivate collaborative partnerships.
- ❑ Offering assistance for organizing entrepreneurship development and skill enhancement training initiatives.

03

Employment Creation and Social Security

- ❑ Establishing avenues for job creation and employment, ensuring food security, bolstering social safety nets, and addressing housing needs.
- ❑ Implementing problem-based learning methodologies to cultivate a highly skilled workforce. Offering upskilling opportunities for migrant workers, including training in information, language, and soft skills, while diversifying temporary migration destinations. Developing a comprehensive labor database to streamline the formation of work groups.
- ❑ Provide SMEs registered under Social Security with a 5% tax rebate on taxable income. Introducing social security measures for workers in the informal sector earning up to Rs.15,000 per month.

04

Agriculture/Farm sector

- ❑ The government is urged to introduce the "Kisan Utpadan Bikri Yojana" (KUBY) scheme, ensuring a guaranteed annual income of Rs 30,000 for small and marginal farmers. Furthermore, announcing a 2% interest subvention for farmers impacted by natural disasters, along with an additional 3% relaxation for timely repayment of agricultural loans, is recommended. This scheme should also encompass farmers involved in animal husbandry, fisheries, and allied sectors, extending support to deprived sector loans.

05

Infrastructure Development and Real estate/Construction

- ❑ Prioritize the timely conclusion of projects with immediate advantages and the continuation of ongoing projects over the next few years. Foster investments in infrastructure, particularly in roads and electricity.
- ❑ Enhance regulatory frameworks while minimizing government intervention in markets.
- ❑ Lower tariffs on imports related to infrastructure and eliminate obstacles to Foreign Direct Investment (FDI). Establish benchmark rates for accessing long-term debt from the market.

06

Micro, Medium and Small Enterprises (MSMEs)

- ❑ Introduce a 2% interest rebate for Micro, Small, and Medium Enterprises (MSMEs) registered under VAT for loans up to Rs. 5 crore. Increase the procurement quota of government enterprises from SMEs to 20%, with a minimum of 5% to be sourced from women-led SMEs.
- ❑ Implement a Credit Linked Capital Subsidy (CLCS) program to facilitate technology upgradation. Establish common facility centers for various purposes such as testing, training, raw material storage, effluent treatment, and supporting production processes.

07

Health

- ❑ Enhance and modernize healthcare infrastructure. Strengthen the capacity of healthcare professionals. Mitigate health risks associated with disease outbreaks.
- ❑ Intensify efforts to mitigate environmental risks. Foster the development of health insurance markets.

08

Assets Monetization

- ❑ Monetization entails generating additional revenue for the government by realizing the value of public assets.

09

Corporate Taxes

- ❑ Companies operating domestically with a turnover not exceeding Rs. 20 crore during the fiscal year 2024/25 will be subject to a reduced tax rate of 16%. The base year turnover for eligibility for this reduced tax rate will be the fiscal year 2023/24.
- ❑ The government aims to transition towards technology-intensive tax assessments and return processing within the next two years. This initiative aims to eradicate personal interfaces and enhance transparency in the tax system.

10

VAT and Capital Gain Taxes

- ❑ Introduce multiple VAT rates, including a 0% rate for agricultural products, within the next two years.
- ❑ Implement proportionate exemption on long-term capital gains from the sale of shares, with the following conditions:
- ❑ Enforce a 2% Capital Gain tax on stocks held for more than 3 years, applicable to capital gains up to Rs. 50 lakh.
- ❑ Enable real estate developers to deduct 50% of Capital Gain derived from the development of affordable housing below Rs. 1.5 crore.

11

The principle of financial good governance

- ❑ Embrace established principles of good governance and market discipline to cultivate a robust system.
- ❑ Enhancing inclusivity and reinforcing the rule of law are imperative for tackling underlying sources of fragility. It's crucial to enhance the quality and accessibility of public services while ensuring accountable and transparent governance. Improving public institutions is essential to bolster progress in various other domains.

12

Natural resource Development

- ❑ Facilitate agricultural growth by enhancing market access and ensuring year-round irrigation availability. Encourage private sector investment in critical sectors such as energy, transportation, health, and education. Enhance planning processes and interagency coordination among government entities to streamline efforts and maximize effectiveness.

The 2024 Budget will be evaluated from two pivotal perspectives. Firstly, the anticipation of bolstering economic growth via capital expenditure, and secondly, the capacity to manage fiscal deficit amidst the escalating uncertainties in the global economy. The government's strategy should extend beyond tax collection, encompassing the monetization of assets to augment revenue streams and alleviate the fiscal deficit. Establishing a target for asset monetization, utilizing the resultant resources to fortify infrastructure, revitalize the economy, and provide support to consumption-driven sectors grappling in the aftermath of the pandemic, is imperative.

2024/25's Budget
should focus on

01

Public investment

- Boost public investment to develop modern infrastructure.
- Promote inclusive development initiatives.
- Enhance institutional capacity for efficient public procurement and contract management.
- Establish clear procedures for asset management and maintenance.

02

Startup ecosystem

- Create a favorable environment for both emerging and established fintech companies and startups. Facilitate easier access to funding at concessional rates and reduced taxation.
- Support startups through policy initiatives and establish Startup Nepal hubs to assist with incorporation, registration, and grievance handling.

03

Energy transition, and climate action

- Transitioning towards energy-efficient solutions.
- The budget should chart the future course of Nepal's energy trajectory.
- Promote green investment initiatives.
- Raise rupee debt from the international market using appropriate instruments designed for this purpose.
- Governments should take the lead in green investment, eliminate regulatory barriers, and support economic activities.

04

Governance and sector structure

- Streamline the roles of government agencies to reduce overlap. Enhance coordination among agencies for improved efficiency.
- Expand private sector involvement to boost expertise.
- Enhance accountability and reinforce the rule of law, dispute settlement including amending FITTA and other pertinent laws and regulations. Facilitate diaspora investment in Nepal.
- Minimize barriers to market entry and exit while enhancing access to international investment opportunities.

05

Underserved and unserved MSME segments

- Enhance credit accessibility..
- Regulate the informal lending sector for greater transparency and consumer protection.
- Simplify the business registration process to encourage entrepreneurship.
- Promote digital infrastructure and innovation, fostering business models that serve the underserved segments of society.

06

Make in Nepal

- Introduce a 2% interest rebate for Micro, Small, and Medium Enterprises (MSMEs) registered under VAT for loans up to Rs 5 crore.
- Increase the procurement quota of government enterprises from SMEs to 25%, with at least 5% sourced from women-led SMEs. Implement an E-procurement System (EoS) platform for Public Sector Enterprises to streamline procurement processes. Ensure the availability of longer tenor debt finance for Make in Nepal projects.

The budget should adopt a transformative strategy to enhance economic growth and sustainable development, focusing on the enhancement of logistics infrastructure. The government should prioritize increased expenditure on infrastructure projects. In terms of Direct Taxation, a comprehensive review of the basic income tax exemption limit, income slabs, and tax rates is essential. Furthermore, the government should introduce and enforce tax and regulatory measures aimed at alleviating taxpayer challenges, minimizing litigation, ensuring certainty, and broadening the tax base.

5

Inflation

Inflation

Given the increase in price of oil and war between Russia and Ukraine the inflation has reached above target level. For FY 2023/24 the GoN set target rate of inflation at 6.5%

Don't let numbers mislead you. Forecasts for Nepal's GDP by various agencies exhibit substantial variation over a brief period. This underscores the potential for misleading figures and emphasizes the importance of exercising caution when employing forecasts to inform policy decisions and growth strategies.

Observations:

1. The global unrest and the surge in commodity prices are poised to negatively impact government revenue receipts. Consequently, achieving the revenue growth target of 9.18% appears to be a formidable challenge.
2. The endeavor to mobilize \$1,611 million in foreign loans appears ambitious. Furthermore, the acquisition of emergency financial assistance from multilateral agencies and securing other loans hinges on the progress achieved in various projects. Hence, it is imperative to enhance the capacity to absorb capital budget allocations effectively.
3. Domestic borrowing totaling \$1,818 million, combined with limited liquidity in bonds and unexpected tax burdens associated with M&A transactions and tax issues related to FPOs, may exert pressure on Banking and Financial Institutions (BFIs). This pressure could potentially dissuade BFIs from extending credit to the private sector.
4. The target of mobilizing \$375 million in foreign grants surpasses the grants received in recent years.
5. Approximately 22.84% of the budget, equivalent to \$3,031 million, has been allocated to provincial and local governments. This allocation reflects a 1.12% decrease compared to the previous year. Nevertheless, the government aims to empower sub-national governments to assume a more substantial role in national priority projects.
6. Certain sections of the Finance Act have retroactively imposed taxes, necessitating explanatory notes to elucidate these clauses.
